ACKNOWLEDGEMENT

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Alhamdulillah, praise to Allah S.W.T. our creator, for giving me strength to prepare this final year project with all the patience and encouragement that have been motivated me to finished it. Therefore, I would like to take this opportunity to express my gratitude to those involved directly and indirectly.

First, I would like to express my special thanks and my sincere appreciation to my final year project supervisor, Miss Norsyazlin Mohd Rosli, for the opportunity to conduct this research study and keep motivate and guide me to complete this final year project. Not forgetting also to coordinator of final study is Dr Eeda Binti Hj Ali and Miss Ana Kashfi Binti Muhammad.

I am extremely grateful to my parents for their love, prayers, caring and sacrifices for educating and preparing me for my future. I would like to say thanks to my friends and final year group project for their constant encouragement. I express my special thanks for my family for always support with the decision I took for my study. I am extending my thanks to all the lecturer of Town and Regional Planning Faculty for their kindness for support during my research project. Lastly, I would like to thank to the iPLAN Malaysia@Selangor for their support to do this project. May Allah S.W.T bless all the goodness.

ABSTRACT

Community Hall is one of the requirement for community facilities, which is important to fulfill the basic for the people and as one of the needs in completing the needs of people. Community hall plays important part, for better understanding, to meet the current needs, potential role and to create a sustainable city in modern urban life. The strategic approach is needed to planning and managing the community hall to carry out its function and roles. This research aim to study specifically on the distribution of community hall and includes the population cap size of needs. This study is based on the data collected from survey and observation survey and secondary data, which is GIS data taken from iPLAN Malaysia@Selangor. The data was analysed to evaluate and study the distribution of community hall accordingly refer to the Garis Panduan Kemudahan Masyarakat, 2013 and using the Buffer Analysis in MapInfo. The findings from this analysis will be the basic preparation of make appropriate recommendations and conclusion. All the recommendations that has made are to develop a better community facilities in order to enhance the well-being of the neighbourhood in Seksyen 7, Shah Alam.
