ACKNOWLEDGEMENT

BISMILLAHIRRAHMANIRRAHIM

I would like to express my gratitude to Almighty, ALLAH SWT for the blessing and for those who helped me along the way in completing this final year project

First and foremost, I would like to extend my deepest gratitude to my advisor Prof. Madya Mohd Nor Bin Hj. Shapiin for his wisdom, guidance, endless help, stimulating suggestions, and valuable discussion in making this proposal and also not forgotten to my second examiner, Madam Sabrina Binti Zahari for her comments and ideas during the completion of this project and presentation.

Secondly, I would like to express my hearty appreciation to my parent and family members for their priceless support, encouragement, consistent love, valuable advices and their understanding, my parent played vital role throughout the completion of this project. Their support means a lot to me .I am indebted to many people who have helped me either directly or indirectly throughout this project.

Last but not least, a token of appreciation to all my colleagues for all the support and cooperation during the development of this project. The support and assistance given from all parties involved in this project is highly appreciated. I sincerely would like to apologize for any mistakes unintentionally made throughout the completion of this project.

Thank you very much

ABSTRACT

The study examines the significant influence between economic variables and number of crimes in Kelantan. The study focused on the relationship of inflation rate, gross domestic product (GDP) and unemployment rate towards the number of crimes in Kelantan. For testing the hypothesis, the study consists of monthly data from September 2012- December 2015 which covered the period of 40 months. E-View was used to analyze the relationship between number of crimes in Kelantan and inflation rate, gross domestic product (GDP) and unemployment rate. The result shows that there is significant relationship which exists between economic variables and number of crimes in Kelantan under this study. Apart from that, the test of hypothesis showed that all of the economic variables indicated a significant relationship with the number of crimes in Kelantan.
