**Title**

**The Use of Parking Area at Hospital Sultanah Bahiyah, Kedah**

Accepted in partial fulfillment of the requirements for a  
Diploma in Town and Regional Planning

Supervisor : \_\_\_\_\_ Dr. Norainah Abdul Rahman

TPS352 Coordinator : \_\_\_\_\_ Dr. Nor Eeda Hj. Ali

Programme Coordinator : \_\_\_\_\_ Dr. Norainah Abdul Rahman

## **ACKNOWLEDGEMENT**

Alhamdulillah, thanks to Allah S.W.T for giving me the opportunity to complete my Final Year Project (FYP) entitled 'The Use of Parking Area at Hospital Sultanah Bahiyah, Kedah'. First and foremost, I take this opportunity to sincerely thanks to my supervisor that also my programme coordinator, Dr. Norainah Abdul Rahman for guiding me from the beginning until I completing my FYP. I am appreciating her guidance in helping me to more understanding the important elements needed in each chapter.

I would also like to thank my subject's coordinator, Dr. Nor Eeda Hj. Ali and Madam Noor Syarafina Sallehudin as assistant coordinator and also includes Miss Ana Kashfi Muhamad that are guiding and preparing a complete writing guideline that is very useful in completing this FYP. Besides that, without their assistance throughout this process, this would not be completed.

Most importantly, this would not be happened without the encouragement from my parents, Hamzah bin Aziz, and Noorhanim binti Aziz and also my family that keeps supporting from the first year until the final year of my study in Diploma of Town and Regional Planning. I am thankful for their sacrifice in raising me.

Last but not least, this FYP report would not have been possible without a million knowledge and helps from all the people that contribute to my challenging journey. I would like to thank you so much for all the support and dedicated involvement in this successful journey.

## **ABSTRACT**

The provision of parking for development must be followed to provided guidelines that this also applied to the hospital that also needs a large parking area. The requirement of parking for each development is based on the parking demand and supply analysis as it is very important. This is to ensure the development has an adequate parking area in order to avoid becomes a big issue to the visitor. The parking has been a long issue at the government hospital and it still happens in this modern era. The reason it still occurred is because of the parking demand that is increasing from time to time and it is hard to control the number of visitors that go to the hospital every day. In fact, the parking supply that been provided at the hospital still cannot accommodate the visitors. These issues cannot easily solve by providing other parking area types that same with the existing but need to see the potentially suitable parking types that can meet the requirements of parking demand and supply at the hospital. Thus, this study's purpose is to study the use of parking area at Hospital Sultanah Bahiyah, Kedah. In this study, there are two (2) types of surveys that will be conducted which are questionnaire survey and observation survey. The purpose of this survey is to collect data about the issues and problems that are occurred at the hospital. The data from both surveys will be analyzed and determine the suitable recommendations to solve the issues. The result from this study can be a strategic plan for handling this problem successfully and the hospital management need to discuss and come out with a good solution where everyone can use the parking area comfortably.
