ABSTRACTS

This research is conducted because of the intention of researching how the usage of ICT would increase the students' ability of singing among the year 5 Kenari in the SK Banggol Guchil. The research would employ the usage of pre-test, observation, post-test and survey forms. These instruments were used in order to answer the research questions. These questions are (i) will the students' ability increase in the activity of singing with the help from the usage of ICT? (ii) How big is the changes in the students' involvement in the singing activities after all the techniques and methods inside this research are used? In the research, a total improvement can be seen. This also meant that the research had achieved its objectives of using technology to help students sing. The suggestion of the future research was also been made.

ACKNOWLEDGEMENT

First of all, I would like to express my grateful for the good health bestowed to me by Allah. With His permission, I am able to complete this action research. I would like to express sincere thanks to the lecturers that had helped me to complete this action research whether directly or indirectly. I would like also to thank my family, especially my wife and my parents for all the support that they had given me. I take this opportunity to express gratitude to all of the Department faculty members for their help and support. May Allah bless you all.
