INTRODUCTION

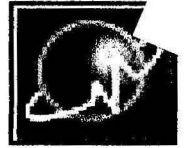

Nowadays Malaysia is on his way to achieve a great country in this world. Many changes has been reached by Malaysia. For example, in technology information, political administration, economy and many other element. One of the changes that all of us can see is the installation and using of tiles and marble in each house in Malaysia.

It means that people in Malaysia have a high class of mind influence by the changing of century. They have a high taste compare with people before this. They want their house, office, apartment, or hotel to look nice by other people. It will attract people to come and sit with a comfortable.

Other than that, the installation and using tiles will show a background of the family. More expensive tiles that been using, will show how rich is the family. But because of the demand, people of low class also can use this marble in theirs' house. People also can avoid their money from going to wrong side or place. For example, by installation this marble, one can avoid themselves by buying a mat that must be change once a year.

Besides that, the research that has been done in Malaysia shows that is still a small competition in this kind of business. It will be healthier if more positive competitors appeared. Even though the capital is high, but it will make a very big profit.

Taking part in this technology, is not only for individual but it also helps the country in achieving its goal in order to be successful in developing technology to make Vision 2020 true. We want to be part of it.
