ACKNOWLEDGEMENTS

Alhamdulillah, Praise to Allah the Most Compassionate and Merciful for giving me the strength to complete this study.

First and foremost, I would like to express my sincere appreciation and gratitude to those who were involved in one way or another that has made this study possible.

To Assoc. Prof. Dr. Ramona Md Tahir, my supervisor, who has been 'extremely' patient, for giving me, a rather erratic student, invaluable foresight and critical comments regarding this study. I really appreciate the veritable treasure trove of knowledge and the final comments on my draft of the study. Her freely given time and intellectual energy was especially important for the development of this endeavour.

To my supervisor's personal assistant, Cik Hasni Shima Bt. Othman, I thank her for her efforts in helping me in scheduling my appointments with Dr Ramona which were extremely helpful especially when there were conflicting issues to be solved.

My deep appreciation goes to the respondents who had participated as informants in the study for making this study possible. A special recognition is recorded to each and every one of them, whose names cannot be revealed for the purpose of confidentiality.
