ABSTRACT

The statement of problem of this research project is to investigate the trend- by understanding the meaning of colour can this contributes to the success of a design and also to investigate to what extend the decision of colour choices can or may impact gender personality.

The aim of this research project is to study the impact of colour, and to establish if gender and/or personality do impact colour choices and preferences towards any consumer product design. Colours do serve many functions in the manufacturing industries such as in fashions, architecture, automobile industry and products designing. Product design classifications include furniture design, electronic goods, house appliances, apparel, fashion accessories, children toys and automobile.

It is hope that the research findings can benefit professionals in education, consumerism and marketing by applying suitable colour schemes in their product designs. The significance of the study is also to confirm the result indicating the differences between genders (adult) in preference for colours and to identify the Malaysian colour preferences.

ACKNOWLEDGMENTS

First and foremost, I would like to say my prayer to Allah s.w.t, who through Him all things are possible.

I am deeply indebted to my supervisor; Associate Professor Dr Kamarudzaman Md Isa for without his continuous support, advice and guidance, this research could not have been completed. Much assistance and co-operation were also received from other faculty members throughout my course. I am extremely grateful to them for their willingness to provide me the necessary information for my research.

I would like to acknowledge my indebtedness to the Colour Consultants of ICI Paints (M) Sdn Bhd namely Puan Khaliah Binti Ismail and Puan Aishah Adam for their unselfish cooperation in providing me with much needed information and the required research experience working with 'Colours' during my field work. My sincere gratitude also goes to the staff members of the Colour Studio of the ICI Paints (M), Nilai, Negeri Sembilan.

I am especially deeply appreciative to my husband Zafruddin Bin Shamsuddin and my children Zafirah Binti Zafruddin and Muhamad Akif Bin Zafruddin for their love, moral support and encouragement, which have enabled me to complete this final phase of my formal education. To Siew Kam Sam, PhD an English lecturer with UiTM, Shah Alam who has helped to edit this thesis.

Last but not least, I would like to extend my thanks to my many professional friends too many to be named, who have always been a source for useful ideas.

Susastri Bte Abdul Rahim.

ABSTRACT	ii
ACKNOWLEDGEMENTS	iii
TABLE OF CONTENT	iv
LIST OF TABLES	ix
LIST OF FIGURES	x
LIST OF PLATES	xiii
CHAPTER 1 INTRODUCTION	1
1.1 Objective of the Study	2
1.2 Colour History	3
1.3 Colour Defination	6
1.4 Statement of the Problem	9
1.5 Significance of the Study	9
1.6 Hypothesis	11
1.7 Limitation	11
1.8 Delimitation	12
CHAPTER 2 LITERATURE REVIEW	
2.1 Colour Wheel Theory Abstract	13
2.1.1 Colour Wheel	14
2.1.2 Primary Colours	16
2.1.3 Secondary Colours	17
2.1.4 Tertiary Colours	18
2.2 Colour Combinations	18
2.2.1 Split Complementary Colour Wheel	19
2.2.2 Double Complement Colour Wheel	20
2.2.3 Alternate Complement Colour Wheel	20
2.2.4 Tetrad- Colour Wheel	21
2.3 Shade and Tint- Colour Wheel	22

2.4	Value	23
	2.4.1 Chroma	24
2.5	How People Perceive Colour	25
2.6	The Definition of Colour Trend	28
	2.6.1 The Importance of Colour Trends	29
