## ACKNOWLEDGEMENT

Bismillahirrahmanirrahim and Praise to Allah for His permissions, I am able to complete this final year project. Without Him, I am not able to stand until this stage of study.

First of all, I am grateful and would to express my sincere and special thanks to my helpful supervisors, Mrs. Nor A'aini Othman for her invaluable guidance, continuous encouragement and constant support in making this research possible. I really appreciate her guidance from the initial to the final level that enabled me to develop an understanding of this research thoroughly. I sincerely thanks for the time spent proofreading and correcting my mistakes. Without her advice and assistance it would be a lot tougher to complete this task. Also not forgetting, Dr. Nor Eeda Hj. Ali who is the TPS352 Coordinator for her courage in coordinating the students in carrying out the study. In addition, a special thanks also to Gs. Mohd Sabri Mohd Arip, Mrs. Anisah Mohd Arsyad, Assoc. Prof. TPr Dr Ahmad Faisal Alias, Mr. Aizazi Lutfi Ahmad, TPr Hjh Maimon Ali and Mr. Hasnizam Ab Dulhamid for conducting and sharing a knowledge for students in workshop series of final year project studies. Without their notes, advice and assistance it would be a lot tougher to complete this project.

Besides, my sincere thanks also go to all friends and members who helped, give co-operation and supports during this study in many ways and made my education journey at UITM pleasant and unforgettable. This three years experience with all you guys will be remembered as important memory for me to face the new chapter of life as a planner.

Then, my sincere gratitude also to my parents for their love, dream and sacrifice throughout my life. I am really thankful for their sacrifice, patience, and understanding that were inevitable to make this work possible. Their sacrifice had inspired me from the day I learned how to read and write until what I have become now. I cannot find the appropriate words that could properly describe my appreciation for their devotion, support and faith in my ability to achieve my dreams.

Last but not least, I would like to thanks everyone who have contributes to my final year project directly or indirectly. I would like to acknowledge their comments and suggestions for the successful completion of this study.

## **ABSTRACT**

The provision of recreational park is one of the facilities that provided by the Local Authority (PBT) for the community used to do a recreational activities in their leisure times. The good provision of recreational park will influence the visitors come to the recreational park. However, most of the provision at recreational parks nowadays generally still no satisfy and does not meet the guidelines standards. Thus, the study aim to determine the provision of Taman Rekreasi Awam Sembilang, Seberang Jaya, Pulau Pinang because there are some issues and problems in this area such as poor of soft-scape elements, lack of facilities and unused of resources for the recreational park. The objectives to achieve the goals are to identify the hierarchy of recreational park in Malaysia, to identify the condition of landscape elements and facilities equipment at the study area and propose the recommendations based on the analysis at study area. Besides, two types of data collection that be used in this study which is primary data and secondary data. Primary data that be used is observation on Google Street View and Google Earth while the secondary data are referring on journal, article, book and website research to gain more information about the study area. Then, ticking on the inventory form during observation as the technique to determine the availability, quantities and condition of existing soft-scape elements and facilities equipment that provides in the study area. Based on the analysis and findings, its show the study area are insufficient of soft-scape element and facilities requirement, poor of landscape design and beautification elements, bad condition and lack maintenance of soft-scape and facilities equipment. Therefore, to solve the issues and problem, some recommendations are be propose involves the provision of new soft-scape planting and facilities and also maintenance such of soft-scape and facilities in the study area. Lastly, the result of the study it is hope that the study can contribute to the improvement of recreational park provision at Taman Rekreasi Awam Sembilang that guarantee the satisfaction of visitors in line with the current needs of the visitors.
