Title

Pedestrian Connectivity in Bukit Bintang, Kuala Lumpur City Centre

Accepted in partial fulfillment of the requirements for a
Diploma in Town and Regional Planning

Supervisor : _____ Ana Kashfi Muhamad

TPS352 Coordinator : _____ Dr. Nor Eeda Hj. Ali

Programme Coordinator : _____ Dr. Norainah Abdul Rahman

ABSTRACT

Pedestrian connectivity is one of the most influential urban design considerations. Pedestrian walkway is one of the important design elements in planning for micro-mobility. Despite its crucial role in connecting people from one place to another, this particular element is often deemed as least important and as the last part to be included in the design stage. This has resulted in discontinuity of network and improper design that affect safety of the user. This study aims to assess pedestrian connectivity at Bukit Bintang area, which is the beating heart of Kuala Lumpur City Centre. Several approaches have been identified to ensure the success of this study and that include observation on the physical attributes of the existing pedestrian facilities, coupled with questionnaire survey targeted for users. Findings from the analysis show that a lot of improvement works need to be done with particular attention on the pavement, network and universal design.

ACKNOWLEDGEMENT

Alhamdulillah, all glory to Allah S.W.T, our creator who gave me strength to complete my final year project paper with all the patience and motivation that bestowed on me throughout this study. I would also like to take this opportunity to express my gratitude to those who directly and indirectly have been involved.

Without the help of several individuals, completion of this work would not have been feasible. First of all, I would like to express my sincere gratitude to my great supervisor, Miss Ana Kashfi Binti Muhamad, for the opportunity to carry out this research and to ensure inspiration, encouragement and invaluable guidance to complete this final year project for me. I am indebted to the people who have been interested in my research and answered my questionnaires. Without their valuable help, I could not complete this research.

Next, I want to express my love and gratitude to my dear parents for their constant support that inspires me to complete this diploma. They were also morally positive. I would also like to thank my friends for their continuous support. My gratitition also to all lectures at the Department of Town and Regional Planning, UiTM Perak Branch, for their kindness in helping me during my final year project paper. Finally, I thank all the people who helped and assisted me in this study and in any way and to Allah, the Omnipotent

CHAPTER 1 BACKGROUND STUDY	
1.1 Introduction	1
1.2 Issues and Problem	2
1.3 Goal and Objectives	4
1.3.1 Goal	4
1.3.2 Objectives	4
1.4 Scope of Study	4
1.5 Study Area	5
1.6 Summary	8
CHAPTER 2 LITERATURE REVIEW	
2.1 Introduction	9
2.2 Key Definitions	9
2.2.1 Definition of Connectivity	9
2.2.2 Definition of Walking	10
2.3 Key Variables	10
2.3.1 Factors in Designing Pedestrian Connectivity	10
2.3.2 Factors that influences walkability	14
2.3.3 Universal Design	16
2.4 Summary	19
CHAPTER 3 DATA ANALYSIS AND FINDINGS	
3.1 Introduction	20
3.2 Data Collection Method	20
3.2.1 Methodology	20
3.2.2 Questionnaire Method	23
3.2.3 Observation Method	24
