ABSTRACT

Wave equation is widely used in physics to describe small vibrations of a tightly stretched flexible string for one dimensional case. Stewart (2012) stated that the wave equations are also used to represent some physical problems in physics such as the motion of a waveform, which are an ocean wave, a sound wave, or a light wave. This project will derive the solutions of the vibrating object for obtaining the vertical displacement of a wave in three dimensional wave equation based on rectangular coordinates. In addition, the Fourier series expansion is used to find a solution. The unique solution of homogenous wave equation can be obtained by using the method separation of variables.

TABLE OF CONTENTS

DECLARATION BY SUPERVISOR	i
DECLARATION BY CANDIDATE	ii
ABSTRACT	iii
ACKNOWLEDGEMENT	iv
TABLE OF CONTENTS	v
LIST OF TABLES	viii
LIST OF FIGURES	ix
LIST OF ABBREVIATIONS AND SYMBOLS	x
CHAPTER 1: INTRODUCTION OF PROJECT	
1.1 Introduction	1
1.2 Overview Concept of Wave Equation	1
1.3 Problem Statement	4
1.4 Objectives	5
1.5 Significance of the Project	6
1.6 Scope of the Project	6
1.7 Project Benefit	6
1.8 Organisational of Report	7
CHAPTER 2: LITERATURE REVIEW AND METHODOLOGY	
2.1 Introduction	9
2.2 Literature Review	9
2.3 Definition of Terms and Concept	11

2.4 Research Step	12
2.5 Conclusion	15
CHAPTER 3: IMPLEMENTATION	
3.1 Introduction	16
3.2 Basic derivation of wave equation	16
3.3 Conclusion	21
CHAPTER 4: RESULTS AND DISCUSSION	
4.1 Introduction	22
4.2 Derivation of three dimensional wave equation with Dirichlet Boundary conditions	22
4.2.1 Example of Dirichlet boundary conditions	34
4.3 Derivation of three dimensional wave equation with Mixed Boundary conditions	37
4.3.1 Boundaries at axis $x = 0$ and $x = a$ are free to move and the rest are fixed to the axis	37
4.3.2 Boundaries at axis $x = 0, x = a, z = 0, z = c$ are fixed to the axis and at axis $y = 0$ and $y = b$ is free to move	46
4.3.3 Boundaries at axis $x = 0, x = a, y = 0$ and $y = b$ are fixed to the axis and boundaries at axis $z = 0$ and $z = c$ are free to move	55
