AUTHOR'S DECLARATION

I declare that the work in this thesis was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the result of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non-academic institution for any degree or qualification.

I, hereby, acknowledge that I have been supplied with the Academic Rules and Regulations for Post Graduate, Universiti Teknologi MARA, regulating the conduct of my study and research.

ABSTRACT

Much concern has been shown towards improving literacy and numeracy by the Malaysian government as reflected in the National Key Results Area (NKRA) of the Government Transformation Programmes (GTP). Taking this as the cue, the focus of this study was to obtain an insight into the relationship between Numeracy Thinking and Mental Computation ability with Brain Hemisphericity among secondary school students ages from 12 to 16. The sample consisted of 414 students in Form 1, Form 2 and Form 4 from six secondary schools located in a district in Malaysia. All the students in this study obtained an A grade in their Mathematic examination. This is a descriptive correlation study using stratified purposive random sampling. The instruments used were the Numeracy Test, Mental Computation Test, Brain Hemisphericity Test. The findings reveal that the students' performance in the Numeracy Test was quite low (mean =36.99 (max =66), SD =7.56) as compared to the Mental Computation Test (mean =27.10 (max =40), SD =7.27). Both the Numeracy and Mental Computation Test has a significant relation with Brain Hemisphericity where high scores were inclined towards left brain students as compared to right brain students. The significant findings of this study also indicate that male students outperform female students in both the Numeracy and Mental Computation Test. The finding is a damning indictment of the examination orientated education and raises questions about the validity of National examination results of Mathematics grades. It is recommended that further research about gender-specific education should be undertaken to analyse these situations.

TABLE OF CONTENTS

	Page
AUTHOR'S DECLARATION	ii
ABSTRACT	iii
ACKNOWLEDGEMENT	iv
TABLE OF CONTENTS	v
LIST OF TABLES	ix
LIST OF FIGURES	xiv
LIST OF ABBREVIATIONS	xv
CHAPTER ONE : INTRODUCTION	1
1.1 Background of The Study	1
1.2 Statement of The Problem	10
1.3 Purpose of The Study	12
1.4 Research Questions	13
1.5 Research Hypotheses	15
1.6 Significance of The Study	18
1.7 Limitation of The Study	19
1.8 Definitions of Terms	20
CHAPTER TWO : REVIEW OF RELATED LITERATURE	22
2.1 Introduction	22
2.2 Development of Numeracy Through Number Sense	22
2.3 Estimation as Tools in Number Sense	28
2.4 Mental Computation as Tools in Number Sense	31
2.5 Brain Hemisphericity as Cognitive Style	36
2.6 Relationship of Gender and Form Levels with Achievement in Mathematics and Brain Hemisphericity	41
2.7 Number Sense and Its Implication on Numeracy and Their Relationship with Brain Hemisphericity	43

2.8	Conceptual Framework of Research	45
2.9	Summary	46
CHAPTER THREE : RESEARCH METHODOLOGY		48
3.1	Introduction	48
3.2	The Research Design	48
3.3	Population and Sample	48
3.4	Instrumentation	51
3.4.1	The Numeracy Test	51
3.4.2	The Mental Computation Test	54
3.4.3	The Brain Hemisphericity Test	56
3.4.4	Validity of Instrument	58
3.4.5	Reliability	60
3.4.5.1	Reliability of the Numeracy Test	60
3.4.5.2	Reliability of the Mental Computation Test	61
3.4.5.3	Reliability of the Brain Hemisphericity Test	61
3.4.6	Pilot Test	62
3.4.6.1	The Numeracy Test and The Mental Computation Test	63
3.4.6.2	The Brain Hemisphericity Test	64
3.5	Data Collection	64
3.6	Data Analysis Procedures	66
CHAPTER FOUR : DATA ANALYSIS		67
4.1	Introduction	67
4.2	Subject of the Study	67
4.3	Findings of Study	68
4.3.1	Data Based on Research Question One	68
4.3.2	Data Based on Research Question Two	70
4.3.3	Data Based on Research Question Three	72
4.3.4	Data Based on Research Question Four	74
4.3.5	Data Based on Research Question Five	77
