ABSTRACT

Photolicious Photography Online Booking System (PPOBS) is a computerized system for photography service that is developed for Photolicious Photography. Currently, Photolicious Photography manage their booking process manually through text messaging, phone calling, Whatsapps and email. The photographer might loss the booking details because it is recorded manually. System Development Life Cycle (SDLC) framework has been used as the guideline to develop the system. It consists of requirements analysis, design, coding, testing and maintenance. The model that has been implemented in the system is Waterfall model. In the evaluation process, the system has been evaluated by the experts from Information Technology and Computer Network background. User evaluation has been conducted with 30 respondents. The questionnaire consists of demographic profile question and the question regarding to the system. Based on the results, the highest mean is on Ease of Use with the value 4.27 (SD=0.64). The data from the survey is collected to be documented. Besides, the experts' comments and suggestions are purposely for the system improvement. It is hoped that PPOBS can be improved to wider the advantage of it to people in the future.
