## **ABSTRACT**

Industrial training is an important phase of a student life. A well planned, properly executed and evaluated industrial training helps a lot in developing a professional attitude. It developed an awareness of industrial approach to problem solving, based on a broad understanding of process and mode of operation of organization. During a period of two months training at Jabatan Kerja Raya Daerah Johor Bahru, most of the theoretical knowledge that has been gained during the course of studies is put to test and can relate to the technical works.

Jabatan Kerja Raya Daerah Johor Bahru, abbreviated JKR, is the federal government department in Malaysia under Ministry of Works Malaysia (MOW) which is responsible for construction and maintenance of public infrastructure in West Malaysia and Labuan. For these purposes, JKR has various departments such as Administration Department, Financial Department, Contract and Quantity Surveying Department, Road Facility Department, Building Department, and Building Facility Department.

## **ACKNOWLEDGEMENT**

It is always a pleasure to remind the fine people in the Civil Engineering program for their sincere guidance I received to uphold my practical as well as theoretical skills in engineering.

Firstly, I would like to thanks to Prof. Dr. Azmi bin Ibrahim (Civil Engineering Dean Academic, University Teknologi Mara) for meticulously planning academic curriculum in such a way that students are not only academically sound but also industry ready by including such industrial training patterns.

I would also like to thanks Mr. Mohd Hazizi bin Jamal (Head of center studies, Civil Engineering Faculty, UiTM Johor Campus Pasir Gudang) for the positive attitude he showed for my work, always allowing me to question him and giving prompt replies for my uncertainties in all the fields including educational, social and managerial work.

I would also like to acknowledge and my heartfelt gratitude to Mr. Mohamed Khatif Tawaf bin Mohamed Yusof (IT Coordinator), Mr. Mohd Firdaus bin Mohd Akhbar (Coordinator) and Ms. Adrina Rosseira binti Abu Talib (Faculty Supervisor) who continuously supported me in every possible way, from initial advice to encouragement till this date.

I express my immense pleasure and deep sense of gratitude to Mr. Mohd Isa bin Sulaiman (District Engineer, JKR (D) Johor Bahru) and my guide and solicitor to Madam Salina binti Ramsin (Industrial Supervisor) for spending their valuable time with me and also helped me in completion of task.

Finally, I would also like to thanks Mr Mohd Azrul Hisham bin Mahin (Engineer of Road & Special Project, JKR (D) Johor Bahru), Mr. Mohd Fadli bin Mohd Shahpeai (Engineer of Building, JKR (D) Johor Bahru) and Madam Chin Lee Ling (Engineer of Building Maintainence, JKR (D) Johor Bahru) for giving me this opportunity and guiding me during the course of the training.
