INDUSTRIAL TRAINING REPORT: VIEWMAN  
ENGINEERING SDN BHD / Nur Syafiqah Saimi**ABSTRACT**

Industrial Training

These training

lecture in class

Besides, it also

learning, communicating, leadership and working with experienced people.

help students in many aspects.

as they have learned during the

practically in real job situation.

experience in many ways such as

Through this Industrial Training, it will help students to understand more about the field of their study. By involving students in this training, it helps to produce skilful employee in the future as they have experienced and was exposed to it. Students were able to discover their own ability through this training as they co-worked with people who are more matured than them. This training also able to teach them to be more discipline and responsible for each and every work they are assign to do.

Usually, students in semester 4 and above will undergo industrial training during the semester break. As a requirement to graduate, students of Diploma in Civil Engineering must complete Industrial Training for 8 weeks.

## ACKNOWLEDGEMENT

I, Nur Syafiqah Binti Saimi would like to send the deepest appreciation to the person involved during my Industrial Training. During the past 8 weeks, there were many experiences I gain when working with these amazing and professional people. I am glad that I was given a chance to learn and experience the real life world.

First and foremost, I would like to thank my Faculty Industrial Coordinator Encik Mohd Firdaus Bin Mohd Akhbar for giving me useful information and guideline during Industrial Training briefing about things that needs to be done before, during and after Industrial Training.

Second, to the company that allowed me to do my internship, VIEWMAN ENGINEERING SDN. BHD. To Executive Director, Encik Ahmad Azam Abd Rahman, my supervisor Encik Mohd Masri Bin Md Zabri, and to all the staffs, who are in spite of being extremely busy with their own job but at the same time they still took a moment to guide and keep me on the correct path until the last day of my internship which the guidance are very useful for my study both theoretically and physically.

Last but not least, both my family, Encik Saimi Bin Abdullah and Puan Noor Azuatullakma Abd Razak, siblings and also my friends for giving me physical and moral support.

I am sure to use the knowledge in the best possible ways as I perceived this gold opportunity for my career development.

Sincerely,

Nur Syafiqah Binti Saimi.
