ABSTRACT

Assalamualaikum w.b.t. My name is Nurul Amira Binti Amir. I am student from the Faculty of Civil Engineering UiTM Pasir Gudang. The main reason engineering students need to do Industrial Training (IT) is so they are well prepared for a graduate job in their chosen field. It is a chance for us to put what we have learned at university to work in the kind of real-life situations we will come up against when we start our career.

First of all, this report is about my industrial training that I have been going through for two month, which is 8 weeks. The place where I having my industrial training is at TPM TECHNOPARK Sdn Bhd company. I choose this place as my location for industrial training is because this company is really good in construction and management. The reason I choose to do my internship locally because I believe that I will gain a lot of experiences which I have yet to explore whether it is related my course or anything that related to real life as an engineer. This internship is a great experience for me to learn and improve as well as to develop new sets of skills.

Nevertheless, my experience having an industrial training at the TPM TECHNOPARK Sdn Bhd can really teach me about working condition and the working attitude in the organization itself. This report consists of four main chapters. In this report, I will tell about my company background, which is for me is a very basic thing to have in a report. This report also consists of organization chart, vision and mission of the company. All about the company is in the chapter one while in the chapter two consists of weekly summary based on my logbook that I have to write it everyday in my industrial training. In the chapter three, it is about a technical report. In that chapter, I tell about what I learned at TPM TECHNOPARK Sdn Bhd Company. All about the test on the site organization, documents and more also have been write down in this report. Last but not least, in the chapter four is about the conclusion of my report, which is about what do I get from undergo through the industrial training. That is all about my report that I can share about. I hope with this information can really taught you something about working for the contractor.

ACKNOWLEDGEMENT

Alhamdulillah, all praises to Allah for the strengths and His blessing in completing this report exactly within given time. First and foremost, special appreciation goes to my supervisor, Ms Adrina who had taken a lot of efforts to arrange our industrial training between us and our employer. Not forgotten, my appreciation to my industrial supervisor Mr ABD Hamid Bin Senin, Project Manager (senior manager) , for his cooperation, knowledge, support and endless patience in teaching me. His cooperation indeed help me and my work became easier and faster.

Besides, I would like to extend my gratitude to the organization, Mr.Haji Ibrahim bin Abdul Samad, Executive director of **TPM TECHNOPARK SDN BHD** for his kindness and his trust for giving me the opportunity to practical training there. And at the same time, a deepest thankful given to Mr helmyzan bin Hamid, Ms Nurul Erny Enyza Bt Buang and Mr Md. Zain bin Mahat as technician and Mr Helmi bin Isa as engineer who had taken a lot of effort to give a guideline during working process in the site construction and answering all my doubtful in designing structures. My acknowledgement also goes to all the officer and office staffs of **TPM TECHNOPARK SDN BHD** management for their cooperations.

Last but not least, I would like to express my heartfelt gratitude to my family, friends and also lecturer for their support, constructive suggestion and also helpful criticism.
