## **ABSTRACT**

The number of theme parks is trending in Malaysia and it has stiffened the competition among the theme park players in the industry. This research studies the impact of perceived quality, past experiences and visitors contentment on visitor intention to revisit LEGOLAND Malaysia Resort over time. The study is done over the period of 12 months and covers a variety of season that reflects a fair perspective in data and summary of contents. By using the descriptive method of study based on the survey approach, questionnaires were distributed with 201 responses and interview sessions are held with LLMR top management. Data accumulated are quantitatively and qualitatively analyzed using business strategic tools and descriptive as well as correlation analysis to answer the research objectives. The outcome of the study found that perceived quality, past experiences and visitors contentment do have significant influence towards intention to revisit LEGOLAND Malaysia Resort. The recommendations outlined in the study suggest that market penetration would be the best method to enhance the sustainability and revenue of LLMR. In addition, by enhancing park facilities and service capabilities, revisit intention can be intensified. The findings of this study are also applicable to the future study of sustainability and longevity of other tourist attractions.

## ACKNOWLEDGEMENT

Firstly, we wish to thank God for giving us the opportunity to embark on MBA program and for completing this long and challenging journey successfully. Our gratitude and thanks go to our supervisor Dr. Azizah Daut cum EMBA Johor Bahru program coordinator. Thank you for the support, patience and guidance in assisting us with this project.

We also would like to express our gratitude to the LEGOLAND Malaysia Resort (LLMR) top management, especially to Mr. Mark Germyn, Mr. Casper Bonavant and Mdm. Thila Muthusamy for providing the information needed in assisting us to complete this research. Our appreciation goes to managers and model citizens of the LEGOLAND Malaysia Resort who provided the facilities and assistance during sampling. Special thanks to the rest of classmates for helping us with this project.

Finally, this thesis is dedicated to our parents for their unflagging love, inspiration and unconditional support towards us. This piece of victory is dedicated to all of you. Alhamdulillah.
