## ABSTRACT

Industrial Training is refers to a program which aims to provide supervised practical training within a specified timeframe. So, every each of the student in UiTM especially student from CS230 and CS244 will do internship at the organization choose by them at the end of the semester. When they done the internship, they will be evaluate by their supervisor. Currently, the process of evaluation is done manually which is the process is not too convenient. After done the evaluation, the evaluation form will be submit to the coordinator for coordinator record. The other problem exist is supervisor delaying submitted of the evaluation form and also the time consuming to key-in the data received by the coordinator. Therefore, in order to solve the problem exist ITOS was proposed to help the flow of process evaluation become smooth and more convenient. The target user of ITOS is student, coordinator and the supervisor at the organization. However, methodology plays an important role to develop the high-quality system. The methodology used is Rapid Application Development. The phases of methodology such as requirement planning, user design, construction and cutover are carefully followed to ensure the system flows going well. Furthermore, the result from user evaluation of six construct shows that the highest mean with the same value is ease of learning which 3.80 (SD=0.41). While, the lowest mean is user satisfaction which 3.00(SD=0.00). The future enhancement is providing the statistical graphical data in the system.

## TABLE OF CONTENTS

<b>CONTENT</b>	<b>PAGE</b>
<b>SUPERVISOR APPROVAL</b>	i
<b>STUDENT DECLARATION</b>	ii
<b>ACKNOWLEDGEMENT</b>	iii
<b>ABSTRACT</b>	iv
<b>TABLE OF CONTENTS</b>	v
<b>LIST OF FIGURES</b>	viii
<b>LIST OF TABLES</b>	x
<b>CHAPTER ONE: INTRODUCTION</b>	
1.1 Introduction	1
1.2 Problem Statement	2
1.3 Objective	4
1.4 Scope	4
1.5 Significance	5
1.6 Framework	5
1.7 Gantt Chart	6
1.8 Conclusion	7
<b>CHAPTER TWO : LITERATURE REVIEW</b>	
2.1 Introduction	8
2.2 Methodology	8
2.3 System Development Model	9

2.3.1	Waterfall Model	10
2.3.2	Rapid Application Development	11
2.3.3	Agile Model	12
2.3.4	Spiral Model	13
2.3.5	V-Model Design	14
2.4	Similar Existing System	15
2.4.1	Google Consumer Surveys	15
2.4.2	SurveyMonkey	16
2.5	Implication	18
2.6	Conclusion	18

### **CHAPTER THREE : METHODOLOGY**

3.1	Introduction	19
3.2	Method Overview	19
3.2.1	System Development Life Cycle (SDLC)	19
3.2.2	Rapid Application Development (RAD)	20
3.3	Requirement Gathering	21
3.4	Planning Phase	21
3.5	Design Phase	23
3.5.1	Process Flow Diagram	23
3.5.2	Context Diagram	24
3.5.3	Data Flow Diagram (DFD)	24
3.5.4	Entity Relationship Diagram (ERD)	25
3.5.5	Table of Information	26
3.5.6	User Interface	29
3.6	Implementation	30
3.6.1	Hardware Requirement	30
3.6.2	Software Requirement	30
3.7	Testing	31
3.8	Evaluation	32
