3.0 RESEARCH METHODOLOGY

3.1 DATA COLLECTION

3.2 REGRESSION TECHNIQUE

3.3 METHODOLOGY FOR ANALYSIS DATA

3.3.1 Simple Linear Regression between GDP, FDI, Interest rate and Inflation rate.

3.3.1.1 Correlation Coefficient (R)

3.3.1.2 Coefficient of Determination (R^2)

3.3.1.3 Durbin-Watson

3.3.1.4 T – Statistic

3.3.1.5 F – statistic

3.3.2 Multiple Linear Regression between GDP, FDI, Interest rate and Inflation Rate

4.0 FINDINGS AND ANALYSIS

4.1 INTERPRETATION OF RESULT- SIMPLE LINEAR REGRESSION

4.1.1 RELATIONSHIP BETWEEN FDI AND GDP

4.1.1.1 TEST OF CORRELATION

(a) Correlation Coefficient (R)

(b) Coefficient of Determination (R^2)

(c) Durbin – Watson

4.1.1.2 TEST OF SIGNIFICANT

(a) T-Statistic

(b) F-Statistic

4.1.1.3 CONCLUSION

ABSTRACT

This project paper is conducted to fulfill the requirement needed by the Faculty of Business Management, University Teknologi MARA. The Researcher has selected a topic entitled '**The Impact of FDI, Interest Rate, and Inflation Rate towards Malaysian Economic Growth**'. This study uses both the Simple Linear Regression and Multiple Linear Regressions in order to study the impact of foreign capital inflow and economic indicator to the Malaysian economic growth. This study has observed about 64 numbers of observations in quarterly basis data from 1990 to 2005. From the findings in Simple Linear Regression and Multiple Linear Regression, the researcher failed to reject H_0 which didn't indicate any significant relationship between independent variable and dependent variables. However, the sign in the regression shows that the FDI, interest rate and inflation rate have negative relationship with the GDP. Meaning that, when the FDI, interest rate and inflation rate increase, the GDP will decrease.
