ABSTRACT

Buying vehicle especially cars in the market for now days is hard decision to make due of changes in various technical and operational parameter specification like body shape, design, technology and many more. Therefore, to overcome from this confusion state some selection procedure techniques are required. In the decision-making model, TOPSIS is one of the selection procedure technique to adopted into this research. This technique provides a base for decision making processes where there are limited numbers of choices but each has large number of attributes. In this project some cars are considered with different attributes and ranked car using TOPSIS technique.

DECLARATION BY THE SUPERVISORS	i
DECLARATION BY CANDIDATE	ii
ABSTRACT	iii
ACKNOWLEDGEMENT	iv
TABLE OF CONTENT	v
LIST OF TABLES	viii
LIST OF FIGURES	ix
1.0 INTRODUCTION OF RESEARCH	1
1.1 Introduction	1
1.2 Background of Study	1
1.2.1 Overview of Technique for Order Preference by Similarity to Ideal Solution Method (TOPSIS)	3
1.3 Problem Statement	4
1.4 Objectives	4
1.5 Significant of Project	5
1.6 Scope of the Project	5
1.7 Project Benefit	6
1.8 Definition of Terms and Concept	6
1.9 Literature Review	8
1.10 Organizational Report	10

1.11	Conclusion	11
2.0	METHODOLOGY	12
2.1	Introduction	12
2.2	Research step	12
2.3	Conclusion	19
3.0	IMPLEMENTATION	20
3.1	Introduction	20
3.2	Implementation and Testing	20
3.2.1	Setting Criteria	21
3.2.2	Selecting Alternative	23
3.2.3	Perform the pairwise comparison for each criteria	26
3.2.4	Calculating in TOPSIS Method	29
3.2.4.1	Step 1: Establish the decision matrix	29
3.2.4.2	Step 2: Calculated a normalized decision matrix	32
3.2.4.3	Step 3: Determine the weightage decision matrix	35
3.2.4.4	Step 4: Identify the Positive and Negative Ideal Solution	38
3.2.4.5	Step 5: Calculate the separation distance of each competitive alternative from the ideal and non-ideal solution	39
3.2.4.6	Step 6: Measure the relative closeness of each location to the ideal solution	42
