ABSTRACT

In this research, it focuses for one country only which is in Malaysia. The researcher wants to determine the relationship between the exchange rate (MYR) as dependent variable and money supply, interest rate and inflation in Malaysia. The researcher use secondary data for conduct this studies, by collecting the data from year 1971 until 2017. The data have being collected from Worldbank and Bank Negara Malaysia. The method that use in this research is Ordinary Least Square (OLS). Based on the result, the exchange rate in Malaysia has significant relationship with the money supply and interest rate. Besides that, from the finding also prove that there is have short run and long run relationship between the dependent variable which is exchange rate and the independent variable which is money supply, interest rate and inflation.
