ABSTRACT

House of prayer in Islam. A mosque is symbolically very important to Muslims, and is a humble way for man to recreate pure divine presence on earth. But mosques are not built according to what is believed to be divine patterns, even if they are divinely guided, nor after very clear rules, except on some few points. It shall have a clear indication of the direction of Mecca, qibla (kibla).

Building maintenance in Malaysia is not a new trend in construction industry. Many buildings need a specific maintenance depend its type, size and use. One of the buildings that need a specific maintenance is mosque. The human satisfactions also can be affected if the mosque and facilities are not maintained very well. There are many mosque in our country did not achieved the human needs. Why this happens? The point is the management maintenance of mosque itself. The good maintenance of mosque can invite more muslims to visit and perform solah.

Now day, JAIS received many complaining about the cleanness of mosque. This problem will be continues if there is no action has been taken to solve the problem. The good maintenance management must be propose to make sure mosque is comfortable to use and to show that cleaning aspect is one of the priority in Islam.

This project is a trial and attempt to answer what the problem in maintenance for mosque at Klang. Relating from above this project try to identify the current situation of maintenance at the mosque, identify the current condition at the mosque and to identify the defect in mosque.
