## ABSTRACT

Shopping for grocery is necessary for living purpose. Budgeting in shopping for grocery is important as cost of living is rising. Due to budget constraint, shoppers have to limit their total purchased to stay within budget. Some ways are used in order to stay within budgets which are calculator and shopping list. However, shopping list cannot show the exact total purchased and calculator needs a lot of pressing key to get the total purchased. Shoppers will refuse to use it and tend to calculate the total purchased mentally which can bring uncertainty in calculation. Therefore, this project is intended to built a mobile application that keep track the total purchased just by scanning the price tag. The objective is to design and develop mobile application that keep track the shoppers spending cost by using Optical Character Recognition (OCR) technique and test the application via functionality test. Optical Character Recognition (OCR) technique is used to recognize the price number on the price tag. Method used in the methodology is agile model. Agile model is used as it is incremental and easy to change the process according to the user needs and requirements. As a result, this application can store shopping list and calculate continuously the total purchased. Unfortunately, it depends on the quality of image such as if the image is blur, the application will not be able to recognize the number captured thus, will not be able to calculate the total purchased correctly. The objective is achieved and there are some recommendation to improve the project which is alert the shopper by popping a notification or sound when they reached their budget.

Keyword : OCR, shopping list, budget

# TABLE OF CONTENTS

<b>CONTENTS</b>	<b>PAGE</b>
<b>SUPERVISOR'S APPROVAL</b>	ii
<b>DECLARATION</b>	iii
<b>ACKNOWLEDGEMENT</b>	iv
<b>ABSTRACT</b>	v
<b>TABLE OF CONTENTS</b>	vi
<b>LIST OF FIGURES</b>	ix
<b>LIST OF TABLES</b>	xi
<b>LIST OF ABBREVIATIONS</b>	xii
<b>CHAPTER ONE: INTRODUCTION</b>	
1.0 Background of Study	1
1.1 Problem Statement	2
1.2 Research Question	3
1.3 Research Aim	3
1.4 Research Objective	3
1.5 Research Scope	3
1.6 Research Significance	4
<b>CHAPTER TWO: LITERATURE REVIEW</b>	
2.0 Introduction	5
2.1 Overview of Shopping for Grocery	6
2.2 Budgeting in Grocery	8
2.2.1 Ways in Organize for Grocery	9
2.2.1.1 Manual Shopping List	9

2.2.1.2 Calculator	10
2.2.2 Comparison Ways in Organize Budget for Grocery	10
2.3 Scanning	11
2.3.1 Barcode	11
2.3.2 QR Code	12
2.3.3 Optical Character Recognition (OCR)	13
2.3.4 Overview Comparison between Types of Scanning	13
2.4 Criteria Optical Character Recognition (OCR)	14
2.5 Existing Application in Organize Grocery Shopping	18
2.6 Conclusion	21

### **CHAPTER THREE: RESEARCH METHODOLOGY**

3.0 Research Methodology	23
3.1 Overview of Research Methodology Model	23
3.2 Detail Research Methodology	24
3.2.1 Planning	25
3.2.2 Analyze the Information	26
3.2.3 Design the Mobile Application	27
3.2.4 Development of Mobile Application	27
3.2.4.1 Application Module	29
3.2.5 Test the Application	29
3.2.6 Documentation	30
3.3 Software and Hardware Requirement	30
3.4 Project Timeline	32

### **CHAPTER FOUR: DESIGN AND DEVELOPMENT**

4.0 Introduction	33
4.1 Design Process	33
4.2 Development Process	37
4.3 Application Module	40
