ABSTRACT

Space saving furniture aims to provide convenience to its users. This study intended to provide insights about the perceptions of Bandar Tun Abdul Razak residents on space saving furniture. This study finds out how the residents perceive as well as figuring the demands for space saving furniture. This study involves all residents within Bandar Tun Abdul Razak, Jengka by relating the main factor which is their current house types either terrace, semi-detached, and bungalow with their perception on space saving furniture. By doing so, the necessity of space saving furniture for this area could be determined. Based on the results of the survey and interview, most of the residents view space saving furniture in a positive manner; convenient in terms of function and space saving, and also trendy. There is a huge demand for space saving furniture therefore space saving furniture is a necessity for the residents.
