ACKNOWLEDGEMENT

“In the name of Allah the Almighty, the Merciful and the Beneficent”

Glory to Allah S.W.T, Most Gracious, the Most Merciful and peaceful upon His messenger Holy Prophet Muhammad S.A.W. All the worship belongs to only Allah. I seek refuge to Allah from the wickedness within and from the evil deeds. I also praised to Allah S.W.T for giving me courage, time, strength and knowledge to complete this research properly.

First and foremost, I would like to express my deepest gratitude to my advisor, Madam Roseliza Hamid for her advices, comments, brilliant suggestions, knowledge and untiring supervision which beyond repayment in preparing this research. Her willingness to share ideas, information and knowledge to make this task successful is highly appreciated. It would have been impossible without their guidance. I would like to express my thanks to my second academic advisor, Mr Ahmad Bukhari Mohd Yasin for his guidance and advices, which also contribute to this research, thus enabling me to complete this research successfully.

I also would like to say my thanks to all staff in Perpustakaan Tengku Anis (UITM) without their help in searching for regarding materials, I might be lack of references.

Last but not least, my heartiest appreciation to my family for the love and everlasting encouragement in realizing my own potential and also to all my friends for their cooperation and support me to complete this project paper. Thank you to them from the bottom of my heart.

Thank you.

ABSTRACT

This study attempts to investigate how the respondent are influenced by the retirement preferences among Kelantanese. The three factors of retirement preferences such as financial status, health status and retirement plans are adopted in this study. Financial status has shown strong correlation with retirement preferences. Questionnaires were distributed among Kelantanese. There is 100 respondent for this research. Descriptive analysis, correlation and regression are used in this study. The result shows that there is positive and significant relationship between retirement preferences and financial status, health and retirement plans.
