### **Abstract**

Industrial Training is a compulsory requirement for students in certain programs at all level higher education especially for university students. To increase the higher chance for graduate to able work, industrial program was introduced to strengthen their knowledge about the hardship of working from outside there. Industrial Training is making the student to learn the concept about working and also the level of opportunities that the student must grab fast. In the world, the competition of works is many and the student must receive the practical experience to know the reliability of market. Industrial Training concept is to make learning opportunities for the students is much easier and the open for job is simple to get.

From this Industrial Training, the student will be able to practicing the skill and the development of working ethics and the quality of project that undertaken. The student also learns about the discipline of working that must be follows. The rules and the regulations of working are different types that must be punctuality. The student will be able to the mode of serious in the working. Students also will exhibit the pleasant interpersonal skills as an individual in working independently, collaborative and multi-function actions. Industrial Training will give a practice to students according to the organization skills in enhancing individual and group effectiveness and productivity. It is also exhibit the good communication among fellow workers and supervisors in issues that related to the project undertaken.

Students of Diploma in Civil Engineering are required to undergo the industrial training at any constructions, consultants, developers or any other agencies that it is related to the civil engineering. These 2 months of industrial training is a part of education that the student must be parts. It has been held during the season break of semester holiday. The student of Diploma in Civil Engineering must be finish first of their semester 4 before there are taking the industrial training. During the last weeks of the industry training, students were supervised and monitored their company's respected supervisor from the faculty.

## **ACKNOWLEDGEMENT**

In the name of Allah, the Most Gracious and the Most Merciful

Alhamdulillah, all praises to Allah for the strengths and His blessing in completing this industrial training. Special appreciation goes to my industrial training supervisor, Puan Siti Nurfarah Syazwani, for his supervision and constant support. His invaluable help of constructive comments and suggestions throughout the experimental and thesis works have contributed to the success of this industrial training. Not forgotten to all co-workers in this office for their supports and knowledge regarding this industrial training.

I would like to express my appreciation to the Industrial Training Committee for their hardworks and support during this industrial training. Sincere thanks also to my faculty supervisor, Prof Ir Zulfairul for coming all the way from Shah Alam to assess me.

Sincere thanks to all my faculty friends for their kindness and moral support during this industrial training.

Last but not least, my deepest gratitude goes to my beloved parents; Mr. Mohd Salim B. Yahya and Mrs. Maimun Bt. Ali and also to my sisters for their endless love, prayers and encouragement. To those who indirectly contributed in this industrial training, your kindness means a lot to me. Thank you very much.
