## ABSTRACT

Assalamualaikum w.b.t. My name is Ariff Fahmi Bin Abdul Ghani. I am study at UITM Pasir Gudang for Faculty of Civil Engineering. The main reason engineering students need to do Industrial Training (IT) is to expose students to work environment in their chosen field. It is an opportunity for us to apply what we have learned at university to work in the kind of real-life situations that we will face when we start our career.

For 8 weeks, I was undergoing industrial training at Jabatan Kerja Raya Daerah Muar, I placed under different units to learn the ins and outs of the company. The units are Road Unit, Building Unit, Facility Unit and Quantity Surveying Unit. In each unit stationed, I was under a different officer to be guided.

For intern also, we should implement a special project as requested by the UiTM Cawangan Pasir Gudang on what we have learned while intern. The report focuses primarily on the company's background, some practical activities during our training, working environment, scope of work, organizational structure and experiences that's I gathered from the company.

I hope this report will meet all required information by the union, and serve as a useful reference and resource for all of us and future generations.

## ACKNOWLEDGEMENT

Alhamdulillah, I would like to express my highest gratitude to Allah S.W.T for His guidance, bless and for giving strength to perform my responsibilities as a trainee and complete this industrial training report within the stipulated time.

My special thank goes to my helpful supervisor, Mr. Muhammad Hanafi Bin Selamat. The supervision and support that he gave truly help the progression and smoothness of the internship programme. Not forget, great appreciation go to the rest staffs of **JKR DAERAH MUAR** that help me and my friends from time to time during the project. The whole program really brought us to appreciate the true value of friendship and respect of each other.

Then, I would like to extend my gratitude to Ir Rahmat Bin Rashib, District Engineer of JKR Daerah Muar for his kindness and give me opportunity to do my industrial training here. Not to forget, sincerely thanks to Mr Mohd Zaharudin Bin Ayeb and Mrs Rinna Binti Misnon and Mrs Faziah Binti Ayub as senior engineer for giving a guideline during working process in the site construction and share a lot of new information throughout my industrial training.

My grateful thanks to Sir Mohammad Johan Bin Mohamed Ibrahim as my Industrial Training Coordinator that take responsibility for this internship training because he really hard worked to make sure to arrange my internship with the company. Not forget to my other lecturer that always gave support and motivation to undergo this internship.

Lastly, to my family and friends that also give me strength and guide to continue my journey as a trainee and complete my internship. Thank you to all of you that involve as direct or indirect to make sure this programme smooth and clear.
