ABSTRACT

The Industrial Training is compulsory course for 4th and 5th semesters' students. The purpose of this course is to exposure students about working environment that involves Civil Engineering field. This course also trains student in term of both technical and social skills to widen their knowledge about this Civil Engineering related course. Thus, students can imagine and know about the work environment in Civil Engineering, So, when they are faced the problems, they will not panic and can manage it wisely.

This report was made to present all progress that student go through the period of Industrial Training. This report consists of four chapters, which are Introduction, Training Attended, Technical Report and Conclusion.

For chapter 1 which is Introduction, students are required to written the company background, organizational structure, nature of the business, products and market strength of the company. In Addition, students need to write further information regarding the students' process. Next, chapter 2 is the Training Attended. This chapter is about the summary of every week that student doing the task given by the staff of the company. It is an easier way to revise what we are doing on every week.

Chapter 3 is the Technical Report. In this students have been asked to explain briefly about the technical skills that they have learned. Usually, students need to write the nature work that involve of technical skills. In Addition, students also needs to write the problem encountered and how to overcome it, experience gained and conclusion of the technical skills they gained. For the last chapter, chapter 4 is the conclusion that can be drawn from students' experience during these 8 weeks of training. For example, the knowledge they gain while going through this industrial training session.

I hope that I have followed the whole requirement for the Industrial Training report. I am hoping that my report is above the satisfactory level and gets the high marks from the lecturer who will evaluate my report. Lastly, I hope that this report I can use it for my future as my reference when I work.

ACKNOWLEDGE

Alhamdulillah, praise upon to Allah S.W.T., I have finish my Industrial Training at Jabatan Kerja Raya (JKR) Daerah Muar for two months which is starting from 18 April 2017 until 12 June 2017.

I would like to thanks to all people who helped me during this practical training especially to the District Engineer of JKR, Ir. Rahmat Bin Rashib and my supervisor and also Building Engineer, Encik Muhammad Hanafi Bin Selamat. Thank you also to other department engineer who helped me which is . Not foget to thank to other staff because all of them teach me a lot of things and always help when I in needs in doing tasks and my report.

With the help from many people, I managed to succeed the process of this project. Special thanks to my family members, classmates and friends who believed in my work and support me to produce a good work, I am very grateful with their support. Thanks to the management department of Jabatan Kerja Raya Daerah Muar as willing to accept me for the industrial training in this company. There lot things that I have learned and it is very useful for me in the future life.
