ABSTRACT

Assalamualaikum w.b.t., my name is Nurfarah Aina Binti Norizlanin. I am student from Faculty of Civil Engineering in UiTM Pasir Gudang. Basically, this report is set out to give the full information about my industrial training. Industrial training is one of the compulsory course in UiTM which students need to complete depends on their scope of subjects that they learn. As for Faculty of Civil Engineering, we need to seeking for whether developer, consultant, construction, factory or any company that offers internship regarding our course. This course is set up for students in order to give them experience and gain knowledge in working environment before facing the real working life. It will help students in developing their skills to work with other in team and it also a chance to build the discipline as we need to deal with many problems.

Besides, student can learn some soft skills by develop their personality along the industrial training session which are teamwork, communication, management, leadership and etc. Moreover, the industrial training can be a platform for student to practice their basic knowledge, capability and efficiency to do work. I have been through my industrial training for two months at Damai Abadi (Johor) Facility Management Sdn. Bhd. This company major in maintenance work and there are a few department within this company which are Civil Department, Mechanical and Electrical Department, Landscape Department, Housekeeping Department and Admin. For civil and m & e department, there are two team under the major department which are corrective and preventive team. I was assigned to Preventive Maintenance (PM) team.

Furthermore, my experience having an industrial training at Damai Abadi really show me about working condition and attitude in an organization. This training give me a good experience from the view of implementing what I have learnt about civil engineering.

ACKNOWLEDGEMENT

In the name of Allah, the Most Merciful, all praise to Him for strength, helps and blessing in completing this report within the time given. First and foremost, a special gratitude goes to my faculty supervisor, Miss Azyan Zafyrah Binti Mohd Zahid for guidance, information and knowledge during completing my training in Damai Abadi. I would like to thank my industrial supervisor, Mr. Noor Aizam Bin Bahauddin that had given their support and knowledge for me to complete my industrial training.

Furthermore, I would like to thank to Mr. Norazam Bin Bani, civil engineering supervisor for his cooperation, knowledge and endless patient in teaching me about the scope of work for this field. His cooperation and his sharing do help me to complete my task on time and make it more easier.

Next, I would like to express my sincerity to the organization, Mr. Radin Herman Bin Radin Hamdi, Facility Manager of Damai Abadi for his kindness and his trust for giving opportunity to me to do my training there. Besides, I would like to thanks all the technicians at this company because treat me well and sharing knowledge that helps me a lot. They also have given me guideline during working process and teach me a lot of skills in maintenance services. Not to forget all staff at Damai Abadi that give their cooperation throughout this training session.

Last but not least, I would like to express special gratitude to my family, friends and lecturers for their support, guidance and helpful criticism that really help me to finish my industrial training.
