ABSTRACT

Industrial training is an obligation for every student in Faculty of Civil Engineering for Diploma in Civil Engineering as a condition of the award of diploma at the end of this course. The aims of industrial training are to provide students with exposure and give experience on the real situation in the field of construction management as an early preparation for the students before stepping into the workplace.

Exposure to real-time working situations in industrial training for industrial training student is able to give them a glimpse of the difference between in workplace and the situation during learning session at university. Industrial training is very useful for students to gain new experiences and it can also make the student personality to become good and be more discipline in time and circumstance. During the time for this government department in Muar District Irrigation and Drainage Irrigation and Drainage Department, industrial training student were able to go through a whole range of new experiences in their life especially in the workplace. While undergoing industrial training, the most important aspect that can get is industrial training can give students the opportunity to know the true nature of work. In addition, industrial training can also enhance the knowledge of students and open the mind of students to think how a product is produced.

In this company, there are various activities that can carry out and not only focusing on the construction sites but also the history of Johor, hydrology and office management. All the information get during this industrial training, it may help to improve industrial training student academic understanding in scope of civil engineering.

ACKNOWLEDGEMENT

Assalamualaikum w.b.t

First of all, the highest appreciation was given to management of the Department of Irrigation and Drainage Muar, Johor for providing the opportunity to undergo industrial training at their company at their company for 8 weeks starting from 8 July 2018 until 2 September 2018. Furthermore, Tuan Haji Sa'adan bin Senin as the industrial supervisor in Department of Irrigation and Drainage Muar (DID) have been helpful and provide new guidance and exposure that are easily understood by industrial training students that relating to Department of Irrigation and Drainage Muar (DID).

In addition, Puan Merani binti Suradi as a manager for industrial training students, had been managing industrial training student matters while undergoing industrial training in this organization. Moreover, a bundle of thanks is given to Encik Hassan bin Othman, Encik Razali bin Rauf and Encik Aslanshah gave much guidance and brought industrial training student to several areas such as stations to collect data after obtaining instructions from Tuan Haji Suhaimi bin Ismail who is from Water and Resources and Hydrology Section. Besides that, all the staff in this company who strive to provide the best understanding to industrial training student have given us new experiences and useful knowledge. This kind of knowledge also can be applied to the next work environment.

Hence, gratitude is addressed to the Faculty of Industrial Training of Universiti Teknologi Mara Cawangan Johor Kampus Pasir Gudang (UiTMPG) which greatly assisted and from the preparation before and after undergoing industrial training and the preparation of industry training reports. Do not forget to both my parents and my friends who have given me support and encouragement encouraging me as well as expressing my passion for undergoing 6 months of industrial training.
