ACKNOWLEDGEMENT

In The Name of Allah, the Most Gracious and the Most Merciful

I would like to express my deepest appreciation to all those who provided me the possibility to complete this report. A special gratitude I honoured to my coordinator, Sr. Mohamad NorFaisal Baharuddin and supervisor, Sr. Mohd Zaki Shamsudin @ Md Noor for this subject BSR360, Practical Training whose contribution in stimulating suggestions and encouragement, helped me to coordinate my study especially in preparing this report. Every session they patiently check and see my progress in the same time guided and contribute the best tips to me either in report or in my presentation.

Other than that, a special appreciation for the site supervisor, for lead me during the training at Parkhill Residence, En Sugiono with position as Senior Site Supervisor. He guided and explained all the about the building from the background of building, all components in the whole system of building until the understanding of handling defects. He sacrificed energy and time during the practical period although he always busy with his works. A very unforgettable good deeds that he contributed as a guidance to finish and complete this report.

Besides that, I would like to dedicate the enormous thanks to my beloved parents who always motivate me to perform the best in my study. The financial support and continuous love are the most precious elements that bring the accomplishment of this study. Besides, a special thanks goes to my classmates that guide and give some tips to make sure that my report complete by time.

Lastly, I hope to achieve excellent and compliment for this practical training and bring honor toward myself.

Thank you.

ABSTRACT

This report covers a review on comprising of water leakage study and issue at new constructed building. Basically, the nature of the study undertaken include: organizational management, literature review of water leakage study and the case study which I focused throughout my practical training. The integration of aspects give me exposure on up-to-date process and practices. I am able to experience the real situations on handling building defects which need the applicable of my knowledge.

As previously mentioned, a brief information about the selected property is discovered in detail through company background, structure and organizational chart. I also identify the project details and know the consultant involved in this project. Next, by making some research and literature review, it give me more understanding on the topic. Based on the inquiry, then we focusses on case study by investigating the current water leaking issue at the building. Further observation lead us to gain concise information on remedial methodology of the current issue.. Finally, regarding to the findings, I should able to determine the problem arise in the building or organization, indirectly shall suggest the relevant recommendation.

To ensure the content of the report is firm, critic session is held at every stage of stage submission which supervised by the eligible supervisor. By examining the progress, the supervisor can monitor us to produce a remarkable report for this practical training.
