**COVID-19 LOCKDOWNS POLLUTION
EMISSIONS MONITORING: MALAYSIA CASE
STUDY**

NUR AINA BINTI MAZLAN

Thesis submitted in fulfilment of
requirements for the degree of
Bachelor of Surveying Science and Geomatics (Hons)

Faculty of Architecture, Planning and Surveying

February 2021

AUTHOR'S DECLARATION

I declare that the work in this thesis/dissertation was carried out in accordance with the regulations of Universiti Teknologi MARA. It is original and is the results of my own work, unless otherwise indicated or acknowledged as referenced work. This thesis has not been submitted to any other academic institution or non-academic institution for any degree or qualification.

I, hereby, acknowledge that I have been supplied with the Academic Rules and Regulations for Post Graduate, Universiti Teknologi MARA, regulating the conduct of my study and research.

Name of Student : Nur Aina Binti Mazlan
Student I.D. No. : 2016706689
Programme : Bachelor of Surveying Science and Geomatics
(Honours) – AP220
Faculty : Architecture, Planning & Surveying
Thesis/Dissertation Title : Covid-19 Lockdowns Pollution Emissions Monitoring:
Malaysia Case Study

Signature of Student :

Date : 15 February 2021

ABSTRACT

Numerous epidemiological researches have proved that particulate matter (PM 2.5) is formally classified as particulate matter with a diameter of less than 2.5 nm, which is one of the most dangerous air contaminants affecting human health, during the Movement Control Order (MCO) within six months. The coronavirus pandemic has led to an increase in air quality index all around the world, especially in Malaysia region. The aim of this study is to assess the impact of COVID19 Lockdown on air pollution emissions monitoring at Selangor and Wilayah Persekutuan District. To achieve the aim, the objectives of this study are to produce the interpolation of API Index map of before for year 2019 and after MCO period for year 2020 and to extrapolate the effect of pollution during COVID-19 lockdown by using Sentinel 5p and Sentinel 2A before and after MCO period. Data that will be used is Sentinel 5P, Sentinel 2A and Air Pollution Index of Malaysia (APIMS) to monitor the air quality that contain nitrogen dioxide concentration. Software that will be used in this process are ArcMap and VISAN application in the Basic Envisat Atmospheric Toolbox (BEAT). This can help the improvement of air quality beyond the spreading of Corona Virus Disease-19 in Malaysia.

Table of Contents

CONFIRMATION BY PANEL OF EXAMINERS	i
AUTHOR'S DECLARATION	ii
SUPERVISOR'S DECLARATION	iii
ABSTRACT	iv
ACKNOWLEDGEMENT	v
List of Figures	ix
List of Tables	x
CHAPTER 1: INTRODUCTION	1
1.1 Research Background	1
1.2 Problem Statement	3
1.3 Research Question	3
1.4 Aim and Objectives	4
1.5 Scope of Study	4
1.6 Significant of Research	4
1.7 Summary	5
CHAPTER 2: LITERATURE REVIEW	6
2.1 Introduction	6
2.2 Definition of Global Emissions	6
2.3 Data Sentinel 5P	6
2.4 Ozone Monitoring of NO ₂	7
2.5 National Air Quality Index (NAQI)	8
2.6 Assessing Nitrogen Dioxide (NO ₂) Levels to COVID 19 Fatality	8
2.6.1 Nitrogen Dioxide (NO ₂) Spatial Distribution	9
2.6.2 The Atmospheric Condition	9
2.7 Comparison of Different Air Pollutants	9
2.8 The Spatialization of PM _{2.5} Concentrations	11
2.8.1 Spatial and Temporal Variations of PM 2.5 Concentrations	12
2.9 Summary	13

CHAPTER 3: METHODOLOGY	14
3.1 Introduction	14
3.2 Flow Chart	14
3.3 Preliminary Studies	16
3.3.1 Study Area	16
3.3.2 Software Used	17
3.4 Data Preparation	17
3.5 Data Collection	18
3.5.1 USGS Earth Explorer	18
3.5.2 Copernicus Sentinel Satellite Constellation	19
3.5.3 Air Pollution Index of Malaysia (APIMS)	19
3.6 Data Processing	19
3.6.1 Mosaicking Image in ERDAS	20
3.6.2 Geoprocessing of IDW Interpolation in ArcGIS	20
3.6.3 Extrapolate Image in VISAN Application	21
3.7 Monitoring Pollution Emission (COVpoll)	24
3.8 Summary	25
CHAPTER 4: RESULT AND ANALYSIS	26
4.1 Introduction	26
4.2 Extraction of Image Data Using Sentinel 2A And Sentinel 5P	26
4.3 Interpolation for Air Pollution Index (API)	27
4.4 Extrapolate Lockdown Air Pollution Monitoring (COVpoll)	30
4.4.1 Monitoring of Air Pollution for Aerosol (AER_AI)	30
4.4.2 Difference Months of Absorbing Aerosol Index	31
4.4.3 Monitoring of Air Pollution for Nitrogen Dioxide (NO ₂)	33
4.4.4 Difference Months of Nitrogen Dioxide Monthly Averages	34
4.5 Summary	35
CHAPTER 5: CONCLUSION AND RECOMMENDATIONS	36
5.1 Introduction	36
5.2 Conclusion	36
