ACKNOWLEDGEMENT

All gracious to Allah as Allah has given me the opportunity in order to complete report successfully and being thankful to him. Along the progress in completely this report, a lot of people have involved in helping me so I would like to thank all of them personally.

Firstly, I would like to thanks to Encik Rahiman due to his that help me to complete this report. Without him, I may not be able to do so. Then, I would like to thanks to Encik Mohd Zaki as visiting lecturer. Next thanks is Encik Ahmad Faisal Baharuddin as Coordinator Practical Lecturer.

An honor to Managing Director, Encik Rahiman as willing to accept me as practical student for five months starting from 5 January 2014 until 5 April 2014. Next thanks to Encik Abdullah as Senior Site Supervisor which had given me guidance and supervises all my work during my training at **AL-RASH CORPORATION SDN BHD**.

Not to forget thanks to my parents. Without them we may have to face a lot of difficulties in completing this report as I don't have the facility to complete this report. They provide me the wealth of money and love so that I will not feel at lost when I were doing my tasks.

Lastly special thanks to **AL-RASH CORPORATION SDN BHD**. Staffs and colleagues who involved either directly or indirectly as their cooperation and information given until this task has successfully completed.

I hope that what I present here is the best out of the best. All of the lacking in details and all of the errors is not meant to be and may it be forgiven. Thank you again to all of you.

ABSTRACT

Practical training is a course that should be completed by all students who took the final semester of Diploma in Building Surveying. Students can choose where company or palace to conduct the practical training.

I have select the company AR-RASH COPORATION SDN BHD as a place for the practical training. I have placed at site Tanah Merah to project and construct a luxury bungalow at Lot 1104, Jalan Padang Siam. The site supervisor as a leader in this site had been appointed to be my supervisor during the training.

During the practical training, I learned about the method of installation of precast concrete wall on site for house. For example, how to install the precast wall.

Practical training will be end after four months the students complete the training. Finally, students will then prepare a report according to the topics that relevant to the work during the practical training that had been done.
