## ABSTRACT

Forecasting is an estimate of the value of a variable or group of variables and saying what will potentially happen at a future time. Malaysia is the second-largest palm oil producer in the world after Indonesia. Although Indonesia is the world's largest palm oil producer, Malaysia is the largest exporter of palm oil in the world. In 2018, lower palm prices were traded. However, it caused the gross export volume to decrease drastically (Kushairi et al., 2019). There is a need to forecast the export quantity of palm oil in Malaysia in order to aid those relevant to the industry to make assumptions or appropriate decisions regarding crop production and export matters. The study has two objectives which is to find forecasted value of the actual data of the quantity of palm oil exports in Malaysia by using Fuzzy Time Series and Artificial Neural Network and to determine the best model by comparing Fuzzy Time Series model and Artificial Neural Network model. From the results, the model that gives the smallest value of MSE, RMSE and MAPE is Fuzzy Time Series (FTS). The value of MSE for Fuzzy Time Series (FTS) is 13107002289 while the Artificial Neural Network (ANN) value is 17778810689. The value of RMSE for Fuzzy Time Series (FTS) is 114485.817 while the Artificial Neural Network (ANN) value is 133337.2067. The value of MAPE for Fuzzy Time Series (FTS) is 5.1063 while the Artificial Neural Network (ANN) value is 7.5328.

<b>ABSTRACT</b>	v
<b>TABLE OF CONTENTS</b>	vi
<b>LIST OF FIGURES</b>	viii
<b>LIST OF TABLES</b>	ix
<b>LIST OF ABBREVIATIONS</b>	x
<b>CHAPTER ONE: INTRODUCTION</b>	
1.1 Background of the Study	1
1.2 Problem Statement	2
1.3 Objective of the Study	2
1.4 Scope of the Study	3
1.5 Significance of the Study	3
<b>CHAPTER TWO: LITERATURE REVIEW</b>	
2.1 Previous Study of Palm Oil	4
2.2 Previous Studies of Fuzzy Time Series (FTS)	4
2.3 Previous Studies of Artificial Neural Network (ANN)	5
2.4 Previous Studies on comparison between Fuzzy Time Series (FTS) and Artificial Neural Network (ANN)	6
2.5 Summary	7

## **CHAPTER THREE: RESEARCH METHODOLOGY**

3.1	Data Collection Method	8
3.2	Data Analysis Method	8
3.3	Fuzzy Time Series Model	8
3.4	Design of Artificial Neural Network	11
3.5	Model Validation	15
3.6	Summary	16

## **CHAPTER FOUR: RESULTS AND DISCUSSIONS**

4.1	Fuzzy Time Series	17
4.2	Artificial Neural Network	37
4.3	Model Validation	44
4.3.1	Model Validation for Fuzzy Time Series	44
4.3.2	Model Validation for Artificial Neural Network	49
4.3.2	Comparison of Models and Selecting Best Model	53

## **CHAPTER FIVE: CONCLUSIONS AND RECOMMENDATIONS**

5.1	Conclusions	54
5.2	Recommendations	54
