ACKNOWLEDGEMENT

Regard to blessing from Allah SWT, I would like to thank to the involved person who had guided me and giving some encouragement and ideas during the practical training in this company. I had successfully completed this practical training in RME Sdn Bhd for 14 weeks starting from 25th November until 29th March 2014 as determined by the faculty. Hopefully, all the knowledge that I had learnt here can be used in the future. Furthermore, I would like to thank to Mr Mohd Nurfaizal Bin Baharuddin for full supported and commitment as the practical supervisor. The knowledge and ideas from him had giving me some input on finishing this final report. An exposure to the introduction of the report and showed their effort to prepare me as basic knowledge before I start my report. I appreciate to all who involved and given a support either directly or indirectly to help this research to be completed. Other than that, I would like to thank to Mr Aminorddin Bin Shamsuddin, the Director of Contract and Technical Department who had guided me a lot through the duration of the practical training. A lot of knowledge and some experience sharing I had learnt from him. Not forgetting my supervisor, Pn Syazana Bt Mahari, the Civil Engineer who had guide me on some related information about this construction project to be complete and finished my case study.

I pray may this report may credits with high mark and also as the references to others in the future. May ALLAH SWT give his bless to me.

Thank You

ABSTRACT

This report briefly described the calculation for the Variation of Price for the government project. The government represented by the Public Work Department had announced several provision and materials which are included in the claim for the Variation of Price. It is made based on several months experience at the RME Sdn. Bhd. at the Contract and Technical Department. This report is divided into several chapters which include the company's and project's background. From the experience here, before this, the calculation is made by using the manual ways, recently the calculation for the Variation of Price can be calculated by easier ways using the Q'Best software which had been invented by the Terengganu Quantity Surveying Divisions. Other than that, the calculation which being made by the Consultant, ATZ Consult Sdn. Bhd. had created some questions by the Contractors. As a conclusion, this report has provided sufficient information on the Variation of Price and the ways to calculate for the readers.
