10.	CONCLUSION	46-47
11.	REFERENCES	48

Background of FELCRA

Lembaga Penyatuan and Pemulihan Tanah Persekutuan (**FELCRA**) was established at the year 1966. The mission is to improve the sector of rural with helping the people joining of activities of country and improve the living standards and the value of their lives

Start from 1 September 1997, while corporatized, **FELCRA** was change the name to FELCRA BERHAD and the status was change from Badan Berkanun to a state owned company .The conversion of these entities allows FELCRA BERHAD to explore new areas of business in line with the aspirations of social development.

Having skills in farm management and core activities of FELCRA Berhad are currently diversifying its field of activity to participate in the industrial sector and the services and business sector.

Eventually FELCRA Berhad to become a successful conglomerate in addition to creating a more dynamic attractive and profitable rural sector in line with operating strategy balancing between profit oriented and social obligation programs.

OBJECTIVE

- Giving the high return value over developed fields.
- Improving quality of life of the target groups participants and staff
- Improving productivity levels through efficiency and management technology
- Enhancing the company's value added economy.

FUNCTION

- Restore and unify the land with approval.
- Request of state authority.
- Approvals of land owner

1	Muster call	Every days
2	Maintenance(spraying)	2 week
3	Manuring	2 week
4	Harvesting	2 weeks
5	Preparation for presentation and presentation	1 week

FELCRA
Berhad

Working experience

First of all, for my working experience in Dor Klaoh was attending Morning Muster or in other word is Muster Call every early morning. The staff will check the workers attendance based on every section and gives some briefing to them.

First two week of my industrial training, we learned about spraying from Tuan Ugan the staff in-charged for Fasa 1. In spraying section, we learned about the importance and how to spray more efficiently. Furthermore, we learn that some of the herbicide are suitable for some category. We also had the chance to join the demonstration of spraying herbicide from a company that promotes their herbicide.

During Hari Raya Aidiladha, we participated in slaughtering cows and dividing the meats. There were 3 cows that we slaughtered.

Next, we learned about manuring for 2 weeks and supervised by Mr Sanny ak Radin, the block conductor and also Mdm. Mollin, the mandore of Fasa 2 division. We were taught about the function of fertilizers, how to apply and when is the most perfect time for manuring. In these weeks, we also learned how to do frond stacking.

Last but not least, we learned about harvesting. We were supervised by Mr Sanny Anak Radin, and taught about what is harvesting, why we need to harvest, the major and minor things in harvesting.
