## **ACKNOWLEDGEMENT**

We would like to pay special thankfulness, warmth and appreciation to the persons below who made my research successful and assisted us at every point to cherish our goal:

My Supervisor, Madam Noraida Abd Karim for his vital support and assistance. Her encouragement made it impossible to achieve the goal.

My Undergraduate Project's lecturer, Dr. Mohd Hairi Jalis, whose reminders and constant motivation encouraged me to meet the deadlines.

All the faculty and staff members, whose services turned our research a success.

Our Mom and Dad, family members and friends, without whom we are nothing; they not only assisted us financially but also extended their support morally and emotionally.

## **ABSTRACT**

The expansion of street food in Malaysia cause some of food handlers lack of food hygiene practices knowledge. Poor food hygiene practices among street food handlers are due to the lack of infrastructure at the street vendors. The aim of this study was to gain an understanding of how food hygiene are practices among street food handlers. A context analysis methodology is used that gathered from journals, related books, conference paper, report and government publications. As for the text, the keyword is categorized based on the list of food hygiene practices. Findings of this study could help to understand on food hygiene practices among street food handlers.

**Keywords:** Street food, hygiene practices, food safety, food-borne illness, food handlers
