ABSTRACT

The purpose of this study was to investigate the comprehension and perception of parents of the benefits towards their children's tertiary level study of music in UiTM. The samples for this study were the parents of students of Music Faculty, UiTM. The respondents for this study were fifty samples from semester one and two from Music Diploma Program. Findings show that the parents' understanding and comprehension of the benefits of music towards foetuses, babies, children, students and adults. Most of the parents understand about the benefits of music on people. This study also shows about the perception of parents of UiTM music students on their children's study of music in UiTM. Their opinions are mixed which is letting their children learn music in UiTM but not encouraging them to pursue a career as a stage musician.

ACKNOWLEDGEMENT

Bismillahirrahmannirrahim,

Alhamdulillah, thanks to Allah SWT, whom with His will gave me the opportunity to complete my research. There are so many people that I would like to thank for their help along with this journey of completing this research that I have taken. I would like to express my gratitude to all those who gave me the possibility to complete this thesis.

First of all, I would like to give a big thank to my great advisor Dr. Nathan Fischer, a new lecturer of Music Faculty in University Technology of Mara, Shah Alam. Thank you for such patient and encouraging guidance for me to complete this thesis. Your time and unflagging energy was always appreciated especially in your proofreading. Secondly, I would like to thank Dr. Ghaziah Ghazali for being there for me when things were hanging and when I had no one to ask for help. With her help, I had so many clues when I was lost and she, without any hesitation was always there to help me. Thank you so much for both of these people with their guidance. Next, I would like to thank Dr. Shahanum for being so concerned about me during the absence of my advisor and lastly, a big thanks to the Head of Degree Performance department, Pn. Siti Nur Hajarul Aswad for appointing a lecturer to be my advisor for this work.

Also, many thanks and appreciations to both of my mama and abah (mom and dad) for being supportive in my thesis completion from the beginning until the end. With their encouraging words, thing that looked so unsure had became real and I got the spirit to
