This practical training report is fulfilment of the practical training course

**PREPARED BY : AHMAD RIFAI'E BIN CHE DAUD**

**SUPERVISING LECTURER'S : Sr. MOHD ZAKI BIN SAMSUDIN**

## **ACKNOWLEDGEMENT**

First and foremost, I want to thanks to Allah SWT because I have finished my report completely on time. I also want to thanks a lot to my mum and dad because they always support me in financial aspect and show their encouragement during my practical training at Pasir Puteh Sentral.

Moreover, I want to thank you to Mr. Zaki bin Mat Yaacob as a site manager, Mr. Badrul as a site supervisor because giving me a huge chance to be a Practical Trainee at Sbj Binajaya Development Sdn. Bhd. Furthermore, a million of thanks to all Club Of Works/Consultants that help me directly and indirectly. Without their helps, the report cannot be finished on time that was given by lectures.

Besides, thank you to Mr. Faisal and Mrs. Zubaidah, our Coordinator for practical training and also lecturer supervisor. Not forget, my supervisor during practical training Sr. Mr. Zaki Samsuddin that giving me information and guide for finishing this report. Thank you to all lectures and Building Surveying Department that show their support and commitment.

I have gain more knowledge and experience during practical training. Besides, I have known how to manage the site, to solve the problem at site, and how to communicate with other workers at site. I think it is a memorable experience to be a part of practical trainee.

Lastly, I hope I was giving the best report based on practical trainee session. Any of weakness or shortages in this report, I totally apologized because I am normal human being. Thank you very much.

## **ABSTRACT**

This report briefly describes the process and methods involved in piling works. It is produced based on the experience of the past five months stationed at the site project. This report is divided by sections and start with the background of the construction project. The observation found that the piling works is not easy as it looks. It involves many parties and professionals to manage the piling works. In this report, it contains all the piling works that occurred at site.

Describing in more details about the process and methods of piling including the pile size, type of pile used, pile shoe, followed by foundation details. This report also includes all the problems and how to solve the problem ( recommendation ).
