CHAPTER 1

PRODUCT DESCRIPTION

1.0 Introduction

NutriHealth Indicator is a portable food indicator that detects and measures various elements in our daily meal such as **calorie, sugar, salt and fat**.

This device combines many indicators that are currently used in the industry. Unlike all the bulky indicators used in hospitals and laboratories, this device uses the same mechanism, science and concept; however NutriHealth comes in a portable size. This device is also able to store information on nutrients, making it easy for customers to track their daily, weekly, and even monthly intake of nutrients.

1.1 Purpose of development

- To calculate the calories, sugar, salt and fats in food.
- For obese, high blood pressure and diabetes individual to keep their nutrients on track.

1.2 Product Concept

- NutriHealth Indicator is a device used to indicate the calorie, sugar, fat, and salt in food.
- A device that combines multiple bulky indicators that are usually used in the industry.
