PENGHARGAAN

Bersyukur kehadiran Allah s.w.t ke atas rahmat yang diberikan kerana memberikan kami kesempatan masa untuk menyiapkan penyelidikan ini. Kami juga ingin mengambil kesempatan ini untuk mengucapkan ribuan terima kasih kepada semua pihak yang terlibat kerana telah memberi semangat dan komitmen untuk menyiapkan penyelidikan ini. Kami juga ingin mengucapkan berbilang terima kasih kepada rakan-rakan pensyarah yang secara langsung atau tidak langsung memberikan buah fikiran dan bantuan. Tidak lupa juga terima kasih kepada pembantu penyelidik (Nik Siti Hadijah Mat Isa) yang membantu kami dalam menyiapkan penyelidikan ini.

Kami ingin mengambil kesempatan untuk mengucapkan berbilang-bbilang terima kasih dan setinggi-tinggi penghargaan kepada:

Dato' Profesor Dr. Hussin @ Mohamad Ab. Rahman
(Pengarah Kampus UiTM Kelantan)

Prof. Madya Dr. Jusoh Yacob
(Koordinator URDC UiTM Kelantan)

dan

Semua responden yang telah meluangkan masa untuk menjawab soal-selidik kajian.

ABSTRACT

Entered the career era in the 21st century are not as easy as it was supposed. In addition, Malaysia was ravaged the economic crisis during 1997. The growth rate of Malaysia economics are low (6.0%), caused the work opportunity are limited. By that, High Education Institute (HEI) graduates must ascertain themselves qualified and met the current work market demand, especially in the industrial sector. Total of unemployment rate among HEI graduates increased to 47000 students in 2003. This situation caused polemics among of the community's expert against quality of student and quality of the course content taught in highest education level. This study was to see the tendency stage of self-employment among University Technology MARA, Kelantan students. UiTM apply the Entrepreneur subject in education with course code ETR 300 Entrepreneur. This study also aimed at seeing acceptance of the students towards the entrepreneur subject to be applied in their career world. This study was undertaken on Diploma level students. About 220 students who consisted the semester 01 and the semester 06 students were involved as the respondent in this study. The tendency level was measured with used accurate matter contain two parts, the Part 1: Personal Details and the Part 2: Career Accurate Matter. Total questions in part 2 are 50 questions using five Likert Scale namely Strongly Disagree, Disagree, Unsure, Agree, and Strongly Agree. Results of the study showed the stage of student's UiTM tendency towards the work personally was interested with total of students 56.4%. The tendency stage of the semester 01 and semester 06 students were 55.3% and 58.6%. This situation pointed out that UiTM students are interest to become an entrepreneur exposure from UiTM increased their interest. However, there are several obstacles apart from the range of UiTM side to handle them after graduated.
