

# **DEVELOPING CLASS SCHEDULER SYSTEM**

**PREPARED BY:**

**MOHAMED IMRAN BIN MOHAMED ARIFF**

**NOVEMBER 2006**

Date : 27 November 2006

Project File No :

Associate Professor Dr. Zain Ahmad,  
Assistant Vice Chancellor,  
Institute of Research, Development and Commercialization (IRDC)  
University Technology Mara (UiTM)  
40450 Shah Alam,  
Selangor Darul Ehsan

Dear

*Associate Professor Dr. Zain Ahmad,*

**FINAL DRAFT: DEVELOPING CLASS SCHEDULE SYSTEM**

In relation to the above matter, herewith I am submitting 3 Final Draft copies entitled  
“**Developing Class Schedule System**”.

Thank you,

Yours Sincerely;

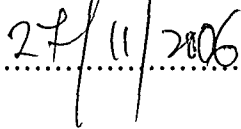

---

# TABLE OF CONTENTS

<i>Acknowledgement</i>	<i>iv</i>
<i>Table of Contents</i>	<i>v</i>
<i>List of Tables</i>	<i>ix</i>
<i>List of Figures</i>	<i>x</i>
<i>Abstract</i>	<i>xi</i>
<b>Chapter 1: Introduction</b>	
1.1 Introduction	1
1.2 Project Objective	1
1.3 Project Scope	2
1.4 Project Plan	3
1.4.1 Software and Hardware Requirement	3
1.4.2 Risk Management	4
<b>Chapter 2: Literature Study</b>	
2.1 Existing Class Scheduling System	5
2.1.1 Intelligent Class Scheduler	5
2.1.2 Visual Class Scheduler 3.1 (VCS)	6
2.2 Software Engineering Methodology	7
2.3 Software Development Model	8
2.3.1 Waterfall Model	8
2.3.2 V-Shape Model	10
2.3.3 Prototyping Model	11
2.3.4 Spiral Model	12
2.4 Software Development Technique	13
2.4.1 Object Oriented	14
2.4.2 Prototyping	16
2.5 Programming Language	18
2.5.1 Oracle	18
2.5.2 Oracle Form Developer	19

## **ABSTRACT**

This research considers a solution to the Class Scheduling problem. The class scheduling problems involves scheduling a number of situation, each consisting of a class of students, a lecturer/teacher, a subject and a room, and lastly with a fixed number of time slots. A basic solution is presented in this research. The algorithm used in this research is the truth table approach. This algorithm has been proven to come out with faster solutions that the standard sequential time-tabling algorithms.
