Supervising Lecturer

Acknowledgement

Assalamualaikum w.t.h

First of all, I would like to express our deepest gratitude to the Almighty God Allah SWT for giving us a chance to complete this assignment on time that we have to submit this assignment. I would like to express thanks to my lecturer Pn. Intan Bayani and my supervisor, for their help and fully supported during do this project. Without them, no one who will guide and teach me to complete this task as soon as possible. However, I would like to thank to my parents and my family for their unending moral support and guide me to strong enough to complete this task. Those who involved either directly or indirectly to help this project complete, thanks a lot may Allah bless all our days.

The research has been done at the Putrajaya International Convention Center at Wilayah Persekutuan Putrajaya as my case study. Besides that, not forget to Encik Faisal, En Hafpis, En Zainuddin, and En Fadzil for cooperate giving the information and what I need in practical report task. There are many things that I have to study about the chosen topic as the main subject to discuss. There is no problem along in my research to finish the project but at the last minutes, I got a little problem that need to settle up and Alhamdulillah, I have done our best and this is my report for Industrial Practical (BSB 351) course.

I still have done some weakness in this assignment because I am not totally perfect but I have tried to do my best performance and give a lot of commitment to complete the task given. I hope that this research will help me to improve my knowledge as a future Building Surveyor. Once again, a lot appreciation to all who are involve in this task given. The best is from Allah S.W.T and the weakness itself is coming from me. Thank you.
