ACKNOWLEDGEMENT

Bismillahirrahmanirrahim. Alhamdulillah, with the Izin of Allah SWT, I have successfully accomplish the BSR 360 Practical Training.

Firstly, special thanks to Sir Sr Mohd Nurfaizal Baharuddin, who is the program coordinator for BSR 360 Practical Training. The highest and sincerest thankful to my dedicated and experienced supervisor Sir Mohd Zaki Shamsudin, who has given the valuable guidance for us during the preparation of Practical Training report and the slide presentation.

Not to be forgotten, special gratitude to the Kenwingston Sdn Bhd, the project director Mr Ryan Tang, duo project manager Mr Yee and Mr Oo, for giving me the precious chance to be part of the team in Parkhill Residence Project Team, senior staff, workers and labour for the best cooperation, guide and help me by providing the most valuable experiences and much information about the construction industry for me during this tough four months. A lot of new knowledge I have learn here and of cause it will not be forgotten.

In addition, to the unforgotten phase 1, Block A and Block B, phase 2, Block C and D teammates, deep sense of gratitude for the precious cooperation and help during the Practical Training. Without every one of you, I will be nothing at all, due to the guidance to help me solved every problems about DLP during my tough time.

Nevertheless, thank you to the direct and indirect involvement of other parties who has also provide the help and keep giving the necessary information for the completion of the practical training and report.

ABSTRACT

Practical Training Report is the most important report that should be prepared by the Practical Training Student of AP 119 Program. The report of the practical training require the student to study and analyze the topic that they select at their selected case study/company. The student shall then relate the collected data with their knowledge in the selected topic. At the end of this study, the students shall be able to identify the strength and weakness also the problems that can be related to the topic based on their case study.

The objectives of the Practical Training are generally to deliver the comprehensive understanding on the surrounding and environment of working life related to the field of study. Besides, it also require the student to learn and analyze through the collected data of the multi-disciplinary approach in case study. In addition, the Practical Training also require the student to be able to prepare a scientific technical report of the topic at their selected case study. Lastly, it also require the students to be able to communicate, work in team, cooperate with the company and confidently present the report to the panel.

For me, the selected topic for the Practical Training Report is Defect Liability Period in terms of contractor responsibilities and the selected case study/company is Parkhill Residence which are located at Bukit Jalil, Kuala Lumpur. The method that has been implement by me to gain the information are generally through 3 basic phase. The first phase is by select the company, then provide the Official Letter from UiTM to prove the student identification and also the cover letter from the student which to inform the intention to be part of the team as a trainee for a semester period. When I have gain the approval, the second phase is by being part of the project team to learn the new things, communicate, work in team, cooperate with the company, able to solve problems, able to handle tasks given, and to have a most valuable experience during the time period. The last phase is by preparing and completing the report by following the guidance provided then will be submitted and the student will do the presentation of their report in front of the panels.
