ABSTRACT

This report is about all the information about the case study through practical training under Jabatan Kerja Raya (JKR) Daerah Bera. The topic of the practical training report is The Installation of Precast Reinforcement Concrete (R.C) Piles for Double-Storey Building. The selected topic is based on the work in progress at the construction site which is the substructure works.

In this report, there are 5 main chapters which tell about the general information of the organization, the information of selected specific topic for the practical training report, the problems and also the recommendations that have been identified during the progress of the works. In chapter 1, it is about the information of the organization that I have undergone my practical training. The scope of works, the function of the organization and the main structure of the organization have been identified.

In chapter 2, it is about the details information from literature review based on the topic selected at the case study. From this chapter, it contains the definitions, functions, types and explanations. In chapter 3, it is about the details information of the case study. The sequences of the works progress, data and results are based on the experiences and observation at the real construction site.

In chapter 4, it concerns the identified problems occurring on the site construction. The recommendation works to the problems have been attached in the way to get the best result of the construction.

ACKNOWLEDGEMENT

First of all, I would like to express my special thanks to Jabatan Kerja Raya (JKR) Daerah Bera for giving an opportunity for me to undergo industrial training at this company. I owe a great many thanks to a great many people who helped and supported me during my industrial training.

My deepest thanks to Jurutera Daerah of JKR Bera , En Ahmad Fathulah Bin Ahmad Halimi for giving me a permission to be here and also wanted to express my special thanks to all staffs at Jabatan Kerja Raya (JKR) Daerah Bera for sharing all those precious guidelines and priceless knowledge that might be useful for me.

Not to forget, I also extend my heartfelt thanks to Mrs. Mahira Binti Othman for being my training supervisor at JKR Bera who encourage, sharing the information needed in the way to help me completing my training at this company. Here also I would like to give my special thanks to Building Department of JKR Bera for giving me the opportunity and give me a lot of encouragement.

Last but not least, I would like to show my gratitude to my industrial training supervisor at UiTM Seri Iskandar, Sr. Mohd Nurfaizal Baharuddin for giving me a good guideline during my industrial training throughout numerous consultations.
