MARA UNIVERSITY OF TECHNOLOGY

PASIR GUDANG

DECEMBER 2019

ACKNOWLEDGEMENT

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

I start with Holy word of Bismillahirrahmanirrahim.

First for all, I would to express my gratitude to Allah S.W.T for give opportunity in my life to complete this study until the end. I would like to thanks to dearest lecturer who always support and give advice to me, Madam Norsaliza binti Abu Bakar for her contribution of time and effort on this research paper. Madam Norsaliza always give an idea and advice how to get the information for this research. In addition, I also appreciate her as she agreed to be my superb supervisor without hesitated. Her encouragement and strong support have made this project finish with successful.

I also would like to thanks to all the lecturers who have strongly give support, also give suggestions and good comments for me to finish this study with successful. A special thanks goes to Madam Nor Fazlin binti Uteh for her good encouragement and strong support for me and also for my friends who studying in UiTM Pasir Gudang, Seri Alam.

To all my friends from semester one until now, thanks to support and give advice when I fell want to give up and encourage me to stand back and continue this study until I finish all the tasks given. All of you give me a strength and support me to go further until I get what I want for this study. Finally, I would like to thankful to my strong mother, my beloved husband and lovely daughter for their good support and their blessings. Without all of them, I will unfinish this study and give up already.

Thank you all.

ABSTRACT

Saving is the good way either for private or public sector. National saving in some country are very important to maintain the economic stable. This research paper aims to identify the factors that affect national saving in Malaysia. This research is taken from the year 1988 until 2018 which is 30 years as an interval time to investigate. There are used secondary data as to form the results and find it through World Development Indicators (WDI). This study determinants that can influenced the national saving, which is Gross Domestic Product, Interest rate, Dependency ratio and Export rate. The main findings are to know either all the independent variables are significant or insignificant with dependent variable. The finding show that the gross domestic product and export rate are negative significant relationship with national saving in Malaysia. But, for interest rate and dependency ratio have a positive relationship with national saving. This result will be more accurate when run the data using EVIEWS 10 SV.

Key words: National Saving, Gross Domestic Product, Interest Rate, Dependency Ratio, Export Rate.
