

MODUL LSC200

ADVANCED LITERATURE SEARCH I:

SCOPUS —————

MODUL OVERVIEW / INTRO

1

What is LSC200 Module?

This module help postgraduate students and researchers in completing their research work. The aim of this module is to introduce peer-reviewed and citation database that produce high quality articles for their research.

3

Teaching Medium

1. Online via Webex, Google Meet, Google Classroom
2. Face to Face : IT Center

2

Module highlight :

- 1.Scopus Source List
- 2.Basic Search
- 3.Authors Search
- 4.Affiliations Search
- 5.Advanced Search in Scopus
- 6.Analyze Search Results
- 7.Article Metrics in Scopus
- 8.Personalization

4

Duration

2 Hour(s)

Research Intelligence

Scopus

Data | Curated. Connected. Complete.

75M+ records. 24,600 titles. 5,000 publishers.

Scopus is a source-neutral abstract and citation database, curated by independent subject matter experts. It places powerful discovery and analytics tools in the hands of researchers, librarians, institutional research managers, and funders.

Scopus generates precise citation search results and automatically updated researcher profiles, creating richer connections between people, published ideas, and institutions. In addition to protecting the integrity of the scholarly record, Scopus helps bolster institutional research performance, rank, and reputation.

Scopus is updated daily, therefore, the numbers presented here are subject to change.

TIPS > NAVIGATION BAR

SOURCES: Click Sources to browse an alphabetical listing or search for available Scopus sources and titles

SEARCH: Click Search to open the Scopus search forms: Document, Author, Affiliation and Advanced

ANALYTICS: Click Analytics to open the Journal Analyzer. Compare up to 10 Scopus sources on the number of citations, documents and percentage not cited

ALERTS: Click Alerts to view a list of a previously saved search, document citation, or author citation alerts

MY LIST: Click My list to view temporary lists of documents. You can Also choose to save documents in a basket permanently

MY SETTINGS: Click My setting to view or modify your account or profile information and to set up preferences

SCOPUS SOURCES LIST

- The Scopus list of journals consists of indexed publications that area either serial or non-serial
- Examples of serial publications are journals, annuals (such as reports, yearbook and directories), and book these are assigned on ISSN (International Standard Serial Number).
- Non-serials include one-off books, monographs, reports, etc, and these are assigned an ISBN (International Book Number).
- From the browse sources tab, you have the option to download a complete source title list to Microsoft Excel.

The screenshot shows the Scopus website interface. At the top, the 'Sources' tab is selected and circled in red. Below the navigation bar, there is a search bar and a dropdown menu for 'Subject area'. A notification banner states 'CiteScore 2023 has been released. View CiteScore methodology >'. On the left, there are filter options for 'Filter refine list' and 'Display options'. The main content area shows '47,680 results' and a table of source titles. The 'Download Scopus Source List' button is circled in red. The table below shows the first entry: 'Ca-A Cancer Journal for Clinicians' with a CiteScore of 873.2, a highest percentile of 99%, 92,555 citations, 106 documents, and 95% cited.

Source title	CiteScore	Highest percentile	Citations 2020-23	Documents 2020-23	% Cited
1 Ca-A Cancer Journal for Clinicians	873.2	99%	92,555	106	95

ADVANCED SEARCH

On the Advanced search form, you can create a search using field codes, proximity operators, or Boolean operators to narrow the scope of the search.

Advanced Search Tips:

https://service.elsevier.com/app/answers/detail/a_id/11365/supporthub/scopus/#tips

Boolean operators to combine different search queries while Proximity operators find words near / within a specified distance of each other.

Boolean operators - OR, AND, AND NOT

Proximity operators - W/n, PRE/n

Advanced search Compare sources >

< Basic Search Advanced Search tips ?

Enter query string

SCOPUS FIELD CODES

Field codes are used in an Advanced search for a term in a specific field.

https://service.elsevier.com/app/answers/detail/a_id/11236/supporthub/scopus/

Examples:

The search **TITLE-ABS-KEY(virus outbreak)** would return documents where the terms appear in the **title, abstract** or **keywords**.

Article						
<input type="checkbox"/>	1	Molecular detection of genetic diversity of foot-and-mouth disease virus [FMDV] of recent outbreak in Iraq	<u>Al-Kalabadi, N.J.</u> , <u>Al-Thwani, A.N.</u>	<u>Journal of Medicinal and Pharmaceutical Chemistry Research</u> , 7(5), pp. 914–925, 20	2025	0

[Hide abstract](#) ^ [View at Publisher](#) ↗ [Related documents](#)

Foot-and-mouth disease [FMD] is an economically devastating, transboundary, and very contagious viral animal infection that influence cloven-hoofed animals. This study was conducted during the period from May-2022 to April-2023, aimed to investigate the genetic diversity of foot and mouth disease **virus** [FMDV] of the recent **outbreak** in Iraq. One hundred and one [101] sample of epithelial tissue were collected from buccal cavity of cattle and buffaloes in some Iraqi governorates. Samples were tested by real time RT-qPCR for detection of FMDV, the result revealed Sixty-three sample were positives for FMDV, and then conventional PCR was carried out for detecting the **virus** serotypes based on the endemic circulating serotype [O, A, and Asia1] of the last **outbreak** in Iraq using specific primers, the result found that all samples negative for these serotypes. Accordingly, some of these samples were sent to the Sap institute in Turkey and diagnosed as SAT2 serotype then confirmed by Pirbright institute in/UK. Conventional-PCR and RT-qPCR applied to diagnose and confirmed all samples, the outcome revealed that all samples were positive for SAT2. Phylogenetic analysis the of VP1 sequence performed for 11 samples the product showed that recent **outbreak** caused by serotype SAT2 and topotype XIV nearly similar to Jor serotype 99% and ETH/2/2022 98%.

ANALYZE SEARCH RESULTS

- **CiteScore** measures average citations received per document published in the journal. It is useful for comparing journals within the same field, ranking them in subject categories and indicating the percentile they fall into.
- **SJR (SCImago Journal Rank)** measures citations weighted by prestige. It is useful for comparing journals within the same field, and forms the basis of the subject category ranking. Q1 journals are cited more often and by more prestigious journals than those in the other quartiles.
- **SNIP (Source Normalized Impact per Paper)** measures citations weighted by the subject field. It is useful for comparing journals not just within the same field but also across disciplines. A SNIP of 1.0 means that a journal's articles are cited at the average rate for all journals in the same subject area; anything over 1.0 indicates more citations than average in the field while a SNIP of less than 1.0 is below the average. A SNIP of more than 1.5 generally indicates a very well-cited journal.

SCOPUS ARTICLE LEVEL METRICS

Scopus Article Level Metrics

PlumX Metrics are comprehensive, item-level metrics that provide insights into the ways people interact with individual pieces of research output:

- Visualizes scholarly engagement
- Includes 5 categories of metrics
- Designed to communicate engagement without a score

Abstract
This article is focused on the importance and influence of Industry 4.0 and consequently the Internet-connected technologies for the creation of value added for organizations and society. The contribution of the article is mostly conceptual. With the development of the Internet, the Internet things that is central to the new industrial revolution has led to "Industry 4.0". The aim of this article is to synthesize the know-how and practice of Industry 4.0, and to investigate the changes that will result from Industry 4.0 and with the development of the Internet of things. © 2018, The Author(s).

SCOPUS PERSONALIZATION - SET ALERT SETTING

The screenshot shows the Scopus 'Set alert' dialog box overlaid on a search results page. The dialog box contains the following information:

- Set alert** (Title)
- E-mail search alert** (Section header)
- Information:** If the email address you input belongs to another individual, ensure you have their permission to sign them up for this alert. Your email address will be included on subsequent email alerts.
- Search terms:** TITLE-ABS-KEY (malaysian AND reading AND habit)
- Name of alert:** malaysian reading habit
- Email address(es):** hazlinkhan@uitm.edu.my
- Frequency:** Every week on Monday
- Status:** Active
- Buttons:** Edit, Save, Set alert

The background search results page shows a table of documents with the following columns: Authors, Year, Source, and Cited by.

Authors	Year	Source	Cited by
Mansor, A.N., Rasul, M.S., Rauf, R.A.A., Koh, B.L.	2013	Asia-Pacific Education Researcher 22(4), pp. 357-365	9
Cheah, Y.K., Ming, M.F., Loh, D.A.	2015	British Food Journal 117(11)	8
