ACKNOWLEDGEMENT

Assalamualaikum,

In the name of Allah The Most Compassionate and The Most Gracious. Alhamdulillah, I manage to complete my final report on time. Even though it's only a short period time to complete this report, but I have try my best to complete the assignment. First of all, I would like to extend my deepest gratitude and special thanks to all those who have directly and indirectly guided me while I'm were doing this report. I want to express my deepest appreciation to my lecturer, Pn Fadhilah Binti Bahardin for helping me throughout my practical period in order to complete this final report.

I express my warm thanks to JKR Perak Tengah for giving me opportunity to have accepted me as their intern in their company. All the staff has given me information and permission for doing this report. They also help me a lot by explain to me and teach me how to do the payment in construction base on my case study. I also would like to disclose my heartfelt to some amazing individuals for the guidance, and advice throughout 14 weeks, the period of my training at JKR Perak Tengah. Besides that, I would like to thank En. Hasni bin Zainuddin and also, the rest of the maintenance department for giving me many new experience including develop my understanding, knowledge, and feel of the real situation of working at department contract, and also some information about construction work. Then, I could like to give my sincere credit to JQS International and also to the staff who have extend their cooperation and help for me to learn and understanding more about working in the construction industry even for a while. It is a big honour for me to be part of JKR Perak Tengah and JQS international even though it is only for 4 months.

Thirdly, I want to say thanks to all my friends who helped me a lot during my 4month internship and to my batch mates & classmates that help me in giving an idea on how to do this report. They never stop giving me their support to complete this entire report and my internship. Their contributions and continuous encouragement are greatly appreciated. I feel very happy that I able to complete this report and this internship right on time.

ABSTRACT.

An Industrial Training is the most important subject among all other subjects throughout 6 semesters in Diploma level of building surveying department students. Students need to go on a training in a real life working surrounding in any related organization. Students in need to use the 4 months well in order to apply what they have been study for the past 5 semesters in their work. At the end of the industrial training, students are able to understand and able to apply what they studied to the real life working surrounding.

In this report, students will state how the works are really like, how they apply to it and how they take action when problems occur and how they solve it after 5 semesters studying in class. Furthermore, an industrial training report consist of few chapters that will explain the understanding of a student the purposes of industrial training in a programme. throughout their 4 months in industrial training. The first chapter is a summary of history of the organization and the company's profile. The first chapter explains about the company's logo, the building view and the location of the company. The chapter also summarise the departments in the company, the organization chart, the vision & mission of the company and also the company's policy.

The second chapter is about the literature review about the road maintenance and the roads in Malaysia. The chapter also explains the about routine maintenance process in JKR Perak Tengah. This chapter also consist the definition of each item of the road routine maintenance activity based on the JKR standard.

The third chapter explains about the case study. It shows how the process of each item in the road routine maintenance is adapted in the case study where the real work happens. Then, it came with the example of a pictorial reports to show as a supporting evidence to the process and give a better view about the items and how it is done.
