ABSTRACT

The purpose of practical training is to make sure that I apply what I've learned from 1st semester until 5th semester. It compulsory for Building Survey student for their last semester before they finish their study in diploma.

By doing an internship, I choose maintenance management as a report title. Impiana Hotel Ipoh is the place that I choose to finish my last semester. I was required to write a log books from first month, 1 March 2018 until my last month of internship 29 Jun 2018. I also need to find something to make my report as requirement of this internship. I choose chiller installation at this hotel as my report.

As a conclusion, by this practical training. I gain more knowledge about maintenance management, maintenance work and much more. I fell so glad from this practical training, I learned more about chiller and HVAC system. It is because I choose chiller installation as my report. I also know about it component and how it work in the building. So, this practical training is very useful for me to gain more knowledge and gain an experience about work.
