

**THE FACTORS OF PERSONAL BANKRUPTCY
IN MALAYSIA**

ZURAIKA BINTI ROSDI

**Submitted in Partial fulfillment of the Requirements
for the Bachelor of Business Administration (Hons)
Finance**

**FACULTY OF BUSINESS MANAGEMENT UITM,
JOHOR**

JANUARY 2020

ACKNOWLEDGEMENT

Alhamdulillah for giving me opportunity to go through on my final year project and made this research project a complete. First and foremost, i would like to show my gratitude and thanks to my advisor Miss Nurul Haida Binti Johan and my final year project coordinator Madam Nor Fazlin Binti Uteh for provide me advices and guidance in the progress of my research. Next, my gratitude for my precious family who gave me motivation and pursue to further study and help me either directly or indirectly to finish this final year project. Finally, for my friends who gave me advice and direction when i needed it to complete this research. Thank you for all that included in finishing this final year project. May Allah ease your way to achieve happiness and successful in life.

ABSTRACT

This study aims to determine the factors that affect the personal bankruptcy in Malaysia. Hence, the dependent variable is personal bankruptcy case. Meanwhile, the independent variables are divorce case, lending rate and unemployment rate. This study use a period from 1989 to 2018 with a total 30 observations. By using Eviews, the data been analyse using descriptive analysis, test on assumption and regression analysis to determine the factor accurately. Based on the result of this finding, it is found that all independent variable has significant relationship toward personal bankruptcy in Malaysia. Divorce case significant positively relationship that effect dependent variable while lending rate and unemployment rate have a significant negatively toward dependent variable.
