ACKNOWLEDGEMENT

First of all, I would like to grant my thanks to Allah swt for giving me strength, ability and time to complete this study. My sincerest thanks extended to my supervisor, Sir Abdul Razak bin Jambari, for his encouragement, guidance and references that he provide to me during completing this study and report.

I also would like to take this opportunity to express my gratitude to all of the lecturers for their support. A special mention goes to Coordinator iNED, Madam Nor Fazlin binti Uteh for the continuous encouragement and support.

Finally, I must express gratitude to my parents and to my spouse for providing me with unconditional support, further encouragement throughout my years of study and through the process of researching and writing the thesis. My accomplishment would never be possible without them.

APPENDIX	46 - 47

ABSTRACT

This paper will identify the impact of the FDI in Malaysia and Singapore with time series data for the period 1970 - 2018 were used and cross refer to the previous researchers. Using several test which is descriptive analysis, stationary test by Augmented Dickey-Fuller (ADF) Test, correlation test, regression analysis and test on assumption, the study show that Export (EXPT), Economy Growth (GDP) and Unemployment Rate (UNEM) are significant variable that affect import demand.

Key words: Impact of FDI, Economic Growth, Export and Unemployment Rate
